Predictive Sentencing Jan W de Keijser, Julian V Roberts, Jesper Ryberg, 2019-05-16 *Predictive Sentencing* addresses the role of risk assessment in contemporary sentencing practices

Predictive sentencing has become so deeply ingrained in Western criminal justice decision making that despite early ethical discussions about selective incapacitation it currently attracts little critique Nor has it been subjected to a thorough normative and empirical scrutiny This is problematic since much current policy and practice concerning risk predictions is inconsistent with mainstream theories of punishment Moreover predictive sentencing exacerbates discrimination and disparity in sentencing Although structured risk assessments may have replaced gut feelings and have now been systematically implemented in Western justice systems the fundamental issues and questions that surround the use of risk assessment instruments at sentencing remain unresolved This volume critically evaluates these issues and will be of great interest to scholars of criminal justice and criminology
