Zimbabwe Step Ahead Olevel Riviision Guide:

(Re)Constructing Memory: Textbooks, Identity, Nation, and State James H. Williams, Wendy D. Bokhorst-Heng, 2016-07-08

This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation. Authors' voices come from a variety of contexts: some historical, some contemporary, some providing analyses over time. But they all consider the changing portrayal of diversity, belonging and exclusion in multiethnic and diverse societies where silenced, invisible, marginalized members have struggled to make their voices heard and to have their identities incorporated into the national narrative. The authors discuss portrayals of past exclusions around religion, ethnicity, sexual orientation as they look at the shifting boundaries of insider and outsider. This book is thus about who we are, not only demographically but also in terms of the past, especially how and whether we teach discredited pasts through textbooks. The concluding chapters provide ways forward in thinking about what can be done to promote curricula that are more inclusive, critical and positively bonding in increasingly larger and more inclusive contexts.

States and the Making of Others Jeanne Bouyat, Amandine Le Bellec, Lucas Puygrenier, 2024-06-17 This volume offers a unique interdisciplinary and comparative perspective on contemporary processes of othering by state institutions in relation to dynamics of racism, xenophobia, sexism, homo transphobia as well as ethnic and class based discriminations. It focuses on eight original case studies empirically grounded in various domains of the social state in Southern African and Western European contexts: the education and health care systems, the regulation of work and of procreation rights and institutions in charge of granting asylum. The authors provide key insights on how states produce Others and on how othering contributes in turn to the process of state formation and the politicization of public action.

The Jaws of a Crocodile Edson Kudzai Mutuwira, 2014-05-27

It is about an orphan girl called Tambudzai. Tambudzai stays with her grandmother. The two live in abject poverty, manifested by a monotonous diet of sadza (thick maize meal porridge) served with wild vegetables or mufushwa (dried cowpeas leaves) as relish every day. To break the monotony, Tambudzai goes out fishing in a crocodile-infested mighty Save River. She catches a lot of fish. She is attacked by a crocodile. The crocodile drags her across a pool in the river and into a tunnel that leads to its nest. The crocodile dumps into its nest what it thought was a corpse to feed its young ones. The young crocodiles hungrily attack Tambudzai, trying to tear off some flesh from her body. Tambudzai recovers consciousness and kills all the young crocodiles. She burrows her way out of the crocodile nest in a bid to escape. On coming to check on its young ones, the mother crocodile finds them all dead. It follows Tambudzai's footprints and crawls out of the nest through the same hole Tambudzai had made and used. Once outside, it sees Tambudzai and it goes after her to avenge for the death of its young ones. Tambudzai tries to quicken her step but she cannot run fast because her leg was broken during the attack. Tambudzai is saved by some dogs that were chasing a duiker. The duiker passed between the crocodile and Tambudzai. The dogs saw the crocodile and attacked it.

This gave Tambudzai a chance to escape from the jaws of the crocodile Catalogue ,2001 **STEM Education in Poverty** Brantina Chirinda,Gladys Sunzuma,Perkins Muredzi,2025-07-15 This book is about Science Technology Engineering and Mathematics STEM education in poverty and the lessons we learn from Zimbabwe The world is driving towards the fourth Industrial Revolution 4IR where economic growth has been attributed to STEM education STEM education is vital in this era where both developed and developing countries are undergo rapid changes Globally STEM education has been practised differently in schools and universities University programs new school curricula instructional methods extracurricular programs and professional development programs for in service teachers have been created to cater to STEM subjects STEM education is envisioned to produce critical thinkers inventors creators problem solvers innovators and professionals who will solve the world s ever changing challenges including inequity food insecurity climate change inequality and poverty STEM is essential to modern education Zimbabwe has faced significant economic challenges but has made remarkable strides in STEM education By examining the successes and challenges of STEM education in Zimbabwe we can learn valuable lessons about improving STEM education in underserved communities This book contributes to the international debate surrounding the optimal STEM education for students in underserved schools It incorporates detailed accounts of STEM education in Zimbabwe schools shedding light on the challenges students and educators face in impoverished areas In Zimbabwe STEM education faces significant challenges such as materials and facilities pedagogy policy reform access and relevance Some of the main issues highlighted in this book are the need for more resources including funding teaching materials and adequate laboratories Effective STEM pedagogy is hampered by an education system that emphasises the curriculum and teacher centred focus instead of focusing on how students can be taught or learn Research has shown that in Zimbabwe STEM teachers must apply inventive pedagogies and suitable learner centred STEM teaching approaches As a result there is a need for more STEM related programs and courses in schools and universities to improve the opportunities for students to pursue careers in these fields Another challenge is the need for more awareness about the opportunities and importance of STEM education and interest in STEM subjects among students which can be attributed to a lack of exposure and understanding of the relevance and importance of these fields in today s world While lack of resources and other challenges hinder effectiveness opportunity lies in promising pathways of policy and practice In Zimbabwe there is a varying degree of success in the implemented competence based curriculum which emphasises inquiry based learning and STEM education Finally there is a need for early exposure to STEM based career opportunities and for more collaboration between the government private sector and educational institutions to address these challenges and promote STEM education in Zimbabwe This book uses Zimbabwe as an example to explore STEM education in poverty By examining the successes and challenges of STEM education in Zimbabwe this book offers valuable insights into how STEM education can be integrated into the curriculum in countries with developing and emerging economies This book is an
