Steve Jenkins, Robin Page, 2020 From Caldecott Honor winning team Steve Jenkins and Robin Page comes an early introduction to one of young readers favorite places the zoo Just a few things that a zookeeper might do at their job to keep their animals healthy well fed and safe would be to brush a hippo's tusks play soccer with a rhino or pretend to be a vulture's mother

Zooland Irus Braverman, 2012-11-28 This book takes a unique stance on a controversial topic zoos Zoos have their ardent supporters and their vocal detractors And while we all have opinions on what zoos do few people consider how

they do it Irus Braverman draws on more than seventy interviews conducted with zoo managers and administrators as well as animal activists to offer a glimpse into the otherwise unknown complexities of zooland Zooland begins and ends with the story of Timmy the oldest male gorilla in North America to illustrate the dramatic transformations of zoos since the 1970s Over these decades modern zoos have transformed themselves from places created largely for entertainment to globally connected institutions that emphasize care through conservation and education Zoos naturalize their spaces classify their animals and produce spectacular experiences for their human visitors Zoos name register track and allocate their animals in global databases Zoos both abide by and create laws and industry standards that govern their captive animals Finally zoos intensely govern the reproduction of captive animals carefully calculating the life and death of these animals deciding which of them will be sustained and which will expire Zooland takes readers behind the exhibits into the world of zoo animals and their caretakers And in so doing it turns its gaze back on us to make surprising interconnections between our understandings of the human and the nonhuman

conocimientos en compasión hacia otros animales como hemos podido ver recientemente en los casos del león Cecil o del gorila Harambe. Pero en su conjunto la creciente comprensión de lo que sienten los animales no está dando como resultado que los tratemos con mayor respeto. Un renombrado experto en comportamiento animal como Marc Bekoff y una destacada profesional en el campo de la biotica como Jessica Pierce exploran el mundo real de lo que experimentan cinco categorías de animales empezando por aquellos que sufren los mayores grados de falta de libertad y de elección: gallinas, cerdos o vacas en los sistemas de producción industrial de alimentos; así como por los animales que se utilizan en los ámbitos de la experimentación y la investigación como ratones, ratas, gatos, perros y chimpancés. A continuación los autores se ocupan de los animales en los que la pérdida de libertad resulta más ambigua y controvertida, principalmente los ejemplares que se mantienen en zoológicos y acuarios o los animales de compañía. Por último, revelan al lector las inesperadas formas en que la actividad humana limita la libertad de los animales que viven en libertad en la naturaleza y abogan por un punto de vista más compasivo. A la hora de enfocar el asunto de la conservación. En cada uno de los casos combinan estudios científicos con relatos de animales concretos con el fin de enfrentar al lector a la maravilla de nuestros compañeros de vida, así como mostrar el sufrimiento que padecen y la necesidad de un profundo cambio de paradigma que de verdad les asegure no un simple bienestar, cuanto un verdadero bien ser. Un libro fundamental para educar y animar a la gente a repensar cómo nuestros comportamientos y modos de vida afectan a otros animales y cómo podemos y debemos desarrollar formas más pacíficas y menos violentas de interactuar con ellos.
