to a world in which people are surrounded with electronic environments that are sensitive and responsive to people. More specifically, this means that electronic devices are bound to disappear into people's backgrounds by integrating them into the environment, extending their functionality to provide ubiquitous communication information and entertainment through inobtrusive and natural interaction with the user.

Advances in Computer Science, Engineering and Applications David C. Wyld, Jan Zizka, Dhinakaran Nagamalai, 2012-05-17 The International conference series on Computer Science Engineering Applications ICCSEA aims to bring together researchers and practitioners from academia and industry to focus on understanding computer science engineering and applications and to establish new collaborations in these areas. The Second International Conference on Computer Science Engineering Applications ICCSEA 2012 held in Delhi, India during May 25-27, 2012, attracted many local and international delegates presenting a balanced mixture of intellect and research both from the East and from the West. Upon a strenuous peer review process, the best submissions were selected, leading to an exciting, rich and a high quality technical conference program which featured high impact presentations in the latest developments of various areas of computer science engineering and applications research.

Renewable Energy Bent Sorensen, 2018-12-14 This four volume set, edited by a leading expert in the field, brings together in one collection a series of papers that have been fundamental to the development of renewable energy as a defined discipline. Some of the papers were first published many years ago, but they remain classics in their fields and retain their relevance to the understanding of current issues. The papers have been selected with the assistance of an eminent international editorial board. The set includes a general introduction and each volume is introduced by a new overview essay placing the selected papers in context. The range of subject matter is considerable, including coverage of all the main renewable technologies, the fundamental principles by which they function, and the issues around their deployment, such as planning, integration, and socio-economic assessment. Overall, the set provides students, teachers, and researchers confronted with thousands of journal articles, book chapters, and grey literature stretching back decades with a ready-made selection of and commentary on the most important key writings in renewable energy. It will be an essential reference for libraries concerned with energy technology and the environment.

Soft Computing: Theories and Applications Millie Pant, Tarun Kumar Sharma, Rajeev Arya, B.C. Sahana, Hossein Zolfagharinia, 2020-06-29 This book focuses on soft computing and how it can be applied to solve real-world problems arising in various domains ranging from medicine and healthcare to supply chain management, image processing, and cryptanalysis. It gathers high quality papers presented at the International Conference on Soft Computing Theories and Applications SoCTA 2019, organized by the National Institute of Technology Patna, India. Offering valuable insights into soft computing for teachers and researchers alike, the book will inspire further research in this dynamic field.

Wireless Sensor Networks and Applications Yingshu Li, My T. Thai, 2008-02-10 Wireless sensor networks are being employed in a variety of applications ranging from medical to military and from home to industry. The principal aim of this book is to provide a reference tool for the increasing number

of scientists who depend upon sensor networks in some way The book is organized into several sections each including chapters exploring a specific topic Wireless sensor networks are attracting great attention and there are many research topics yet to be studied In this book the topics covered include network design and modelling network management data management security and applications The articles presented in the book are expository but of a scholarly nature including the appropriate history background a review of the state of the art thinking relative to the topic as well as a discussion of unsolved problems that are of special interest The target readers of this book include the researchers in computer science computer engineering and applied mathematics as well as students in these subjects Specialists as well as general readers will find the articles stimulating and helpful

Book Organization The book is organized into five sections Section I introduces the design and modelling of sensor networks Chapter 1 by Iyer Kulkarni Mhatre and Rosenberg presents a taxonomy of wireless sensor networks based on their application level objectives traffic characteristics and data delivery requirements Popa and Lewis in Chapter 2 describe some algorithms for systematic exploration of unknown environments using a mobile wireless sensor network

Dementia David Ames, John T. O'Brien, Alistair Burns, 2017-02-24 Dementia represents a major public health challenge for the world with over 100 million people likely to be affected by 2050 A large body of professionals is active in diagnosing treating and caring for people with dementia and research is expanding Many of these specialists find it hard to keep up to date in all aspects of dementia This book helps solve that problem The new edition has been updated and revised to reflect recent advances in this fast moving field

Sensing Technology: Current Status and Future Trends

III Alex Mason, Subhas Chandra Mukhopadhyay, Krishanthi Padmarani Jayasundera, 2014-09-26 This book contains a collection of selected works stemming from the 2013 International Conference on Sensing Technology ICST which was held in Wellington New Zealand The purpose of the book is to distill the highlights of the conference and therefore track the latest developments in sensing technologies The book contents are broad since sensors can be applied in many different areas Therefore the book gives a broad overview of the latest developments in addition to discussing the process through which researchers go through in order to develop sensors or related systems which will become more widespread in the future The book is written for academic and industry professionals working in the field of sensing instrumentation and related fields and is positioned to give a snapshot of the current state of the art in sensing technology particularly from the applied perspective

Computational Intelligence in Sensor Networks Bijan Bihari Mishra, Satchidanand Dehuri, Bijaya Ketan Panigrahi, Ajit Kumar Nayak, Bhabani Shankar Prasad Mishra, Himansu Das, 2018-05-22 This book discusses applications of computational intelligence in sensor networks Consisting of twenty chapters it addresses topics ranging from small scale data processing to big data processing realized through sensor nodes with the help of computational approaches Advances in sensor technology and computer networks have enabled sensor networks to evolve from small systems of large sensors to large nets of miniature sensors from wired communications to wireless communications and from static to dynamic network topology In

spite of these technological advances sensor networks still face the challenges of communicating and processing large amounts of imprecise and partial data in resource constrained environments Further optimal deployment of sensors in an environment is also seen as an intractable problem On the other hand computational intelligence techniques like neural networks evolutionary computation swarm intelligence and fuzzy systems are gaining popularity in solving intractable problems in various disciplines including sensor networks The contributions combine the best attributes of these two distinct fields offering readers a comprehensive overview of the emerging research areas and presenting first hand experience of a variety of computational intelligence approaches in sensor networks **The World Factbook** ,2007 *Multi-hop Routing in Wireless Sensor Networks* Shalli Rani,Syed Hassan Ahmed,2015-09-21 This brief provides an overview of recent developments in multi hop routing protocols for Wireless Sensor Networks WSNs It introduces the various classifications of routing protocols and lists the pros and cons of each category going beyond the conceptual overview of routing classifications offered in other books Recently many researchers have proposed numerous multi hop routing protocols and thereby created a need for a book that provides its readers with an up to date road map of this research paradigm The authors present some of the most relevant results achieved by applying an algorithmic approach to the research on multi hop routing protocols The book covers measurements experiences and lessons learned from the implementation of multi hop communication prototypes Furthermore it describes future research challenges and as such serves as a useful guide for students and researchers alike
