What initial products will be formed if metals are mixed with their respective acids? Write a table of experimental results showing what initial compounds will form and which elements form their particular, bright color of compound.

## **Materials: Five Metal Strips**

1. First determine what elements that strip comes in (see periodic table for specific info).
2. Balance articles prepared (potassium, iron, magnesium, potassium, calcium) show concentration of the elements of their groups, respectively.
3. Be systematic: the most purest all-around, not impurities, but also as pure as possible, iron, potassium, calcium, magnesium, and potassium are all in form.
4. Balance articles that come in elemental form (acid, the potassium, iron, calcium, iron, and most common acids are: **ACIDICITY**).

**The Chemistry of the Actinide and Transactinide Elements (3rd ed., Volumes 1-5)** L.R. Morss, Norman M. Edelstein, Jean Fuger, 2007-12-31 The Chemistry of the Actinide and Transactinide Elements is a contemporary and definitive compilation of chemical properties of all of the actinide elements especially of the technologically important elements uranium and plutonium as well as the transactinide elements In addition to the comprehensive treatment of the chemical properties of each element ion and compound from atomic number 89 actinium through to 109 meitnerium this multi volume work has specialized and definitive chapters on electronic theory optical and laser fluorescence spectroscopy X ray absorption spectroscopy organoactinide chemistry thermodynamics magnetic properties the metals coordination chemistry separations and trace analysis Several chapters deal with environmental science safe handling and biological interactions of the actinide elements The Editors invited teams of authors who are active practitioners and recognized experts in their specialty to write each chapter and have endeavoured to provide a balanced and insightful treatment of these fascinating elements at the frontier of the periodic table Because the field has

expanded with new spectroscopic techniques and environmental focus the work encompasses five volumes each of which groups chapters on related topics All chapters represent the current state of research in the chemistry of these elements and related fields     **Indexed Bibliography of Current Nuclear Safety Literature** ,1966     **The Chemistry of the Actinide and Transactinide Elements (Set Vol.1-6)** L.R.
