Brand Choice and Loyalty Beat Meier, 2019-09-26 By analyzing a large car registration dataset Beat Meier shows various aspects of consumer behavior in the context of durable goods He thereby isolates various influences on purchase decisions e.g. the brand owned before the price and demographic variables Furthermore he investigates the short term effects of tax incentives and reputation shocks on brand choice and brand loyalty The dataset used is very unique and allows a longitudinal examination of the cars owned by a person This permits to gain insights on consumer behavior of durable goods that are relatively expensive and bought infrequently Marketing Management in Turkey Selcen Ozturkcan, Elif Yolbulan Okan, 2018-07-30 Elif Yolbulan Okan and Selcen Ozturkcan examine marketing opportunities market potential and standardization and customization opportunities available within one of the fastest growing of the world's emerging economies namely the Turkish economy which according to a recent PWC report could outstrip the Italian economy by 2030 in many areas *Reskilling America* Katherine S. Newman, Hella Winston, 2016-04-19 From Katherine Newman award winning author of *No Shame in My Game* and sociologist Hella Winston a sharp and irrefutable call to reenergize this nation's long neglected system of vocational training After decades of offshoring and downsizing that have left blue collar workers obsolete and stranded the United States is now on the verge of an industrial renaissance But we don't have a skilled enough labor pool to fill the positions that will be created which are in many cases technically demanding and require specialized skills A decades long series of idealistic educational policies with the expressed goal of getting every student to go to college has left a generation of potential workers out of the system Touted as a progressive egalitarian institution providing opportunity even to those with the greatest need the American secondary school system has in fact deepened existing inequalities We can do better argue acclaimed sociologists Katherine Newman and Hella Winston Taking a page from the successful experience of countries like Germany and Austria where youth unemployment is a mere 7% they call for a radical reevaluation of the idea of vocational training long discredited as an instrument of tracking The United States can prepare a new high performance labor force if we revamp our school system to value industry apprenticeship and rigorous technical education By doing so we will not only be able to meet the growing demand for skilled employees in dozens of sectors where employers decry the absence of well trained workers we will make the American Dream accessible to all *Frameworks for Discursive Actions and Practices of the Law* Jan Engberg, Girolamo Tessuto, 2019-01-15 This volume provides descriptive and interpretive insights into the living usage of language and other semiotic modes in building and performing the law across academic professional and institutional contexts where issues arise from the meaning and function of legal texts discourse and genre in constituting and enabling conventions albeit dynamically and account for the socially and interculturally influenced forms of discursive actions and practices The twenty contributions included here weave significant contexts and situations for legal discourse and practice into a tight thread and justify selected topic areas through a variety of approaches
