

Wired RainSensor™ - Model 53769 RainSensor™ + Freeze - Model 53853 Installation Guide

Introduction

Adding a RainSensor or RainSensor + Freeze to your automatic sprinkler system is an effective means of conserving water and lowering your monthly water bill, while promoting a healthier lawn and garden. Designed for ease of installation, your sensor-controlled irrigation system will be up and running in minutes.

Prior to installing the RainSensor, take a few moments to read through the instructions in their entirety. Since the RainSensor is designed to work with most makes and models of automatic sprinkler timers, you should also refer to the instructions provided with your timer for specific information regarding the connection and use of a rain sensor or rain switch.

⚠ Important:

The RainSensor is rated for 24 VAC power only. Connecting to a higher voltage may result in severe equipment damage.

Installation methods must comply with all applicable national and local electrical codes. If you are unsure about proper wiring practices, have a qualified contractor perform the installation for you.

The RainSensor must not be submerged. Do not install the sensor inside a rain gutter or any location where water can accumulate.
