 This is a simple game You throw the ball You hit the ball You catch the ball This simplification works well for biomechanists
 too as sports can be broken down into specific physical tasks like throwing hitting catching and running There have been
 significant advances in understanding some actions but not others In the first ten years of the journal Sports Biomechanics
 only 18 of 236 articles were about hitting a ball This scarcity is startling considering that according to USA Today May 20
 2005 three of the five hardest things to do in sports involve hitting a ball 1 baseball batting 4 golf tee shot and 5 tennis serve
 return This book provides the latest biomechanical research in the under studied field of hitting a ball The biomechanics of
 baseball cricket hockey hurling softball table tennis and tennis are all examined The chapters are written in a style that will
 both satisfy the high standards of biomechanists and provide information for instructors and athletes to improve performance
