Clinical Neuropsychology Study Guide and Board Review Kirk J. Stucky, Michael W. Kirkwood, Jacobus Donders, 2014

The Clinical Neuropsychology Study Guide and Board Review provides an easy to study volume with sample questions and recommended readings that are specifically designed to help individuals prepare for the ABCN written examination. In addition, this book can also be used as a teaching tool for graduate students and trainees at various levels. The book is divided into three sections: Section I Foundations of Clinical Neuropsychology, Section II Fundamentals of Assessment, and Section III Disorders and Conditions. The format is geared toward exam preparation and is much less dense than a typical textbook. Materials are provided in a concise, outlined manner with liberal use of bullets, boxes, and illustrations, tables that allow readers to easily review and integrate information into their already established knowledge base. To augment the study guide, a recommended readings list at the end of each chapter provides references to more comprehensive materials considered important or seminal in each topic area. Resources in Education, 1996. Using Language Learning Materials Claudia Fernández, Adon Berwick, 2022-07-15. This volume centres on the domain in materials research that is the least investigated: how language teachers and learners use materials. Issues such as how the use of materials by teachers and learners inform materials writers, whether and how teachers' perspectives influence how they perceive and enact materials, and what are the factors that contribute to teachers' use of both traditional and innovative textbooks are discussed here. The volume also addresses some of the theoretical frameworks that inform materials use and will advance the readers' understanding of this promising area of materials research. It will appeal to postgraduate students, teachers, materials developers, and researchers.

Tackling Disadvantage and Underachievement in Schools Diane Montgomery, 2020-03-13. This practical resource shows what teachers can do to combat disadvantage and underachievement in schools and from early years to secondary education. Written by an experienced teacher, teacher educator, and chartered psychologist, the book highlights effective teaching and learning methods that can be used to overcome barriers to learning, satisfy different learning needs, and help students achieve their full potential. Packed with up-to-date research, useful guidance, and examples, the book explores what schools have done and what they can do without need for extra resourcing. It includes case studies that examine the types of underachievement patterns that are found across age ranges and, by detailing approaches in subject teaching, defines the nature of effective learning and shows what strategies can be used to meet these criteria. Moreover, the chapters provide an exploration into the central needs of underachieving and disadvantaged learners across the ability range. Information about how to audit the provision and the needs, accessible resources for the classroom, changes that need to be made to the education and training of teachers. *Tackling Disadvantage and Underachievement in Schools* is essential reading for teachers in early years education and primary and secondary schools, teachers in training, and their educators, as well as leaders, policymakers, researchers, and anyone interested in improving performance in schools. **Personalized System of**
