**Ancestral Memory in Early China** K.E. Brashier, 2020-10-26 Ancestral ritual in early China was an orchestrated dance between what was present the offerings and the living and what was absent the ancestors The interconnections among the tangible elements of the sacrifice were overt and almost mechanical but extending those connections to the invisible guests required a medium that was itself invisible Thus in early China ancestral sacrifice was associated with focused thinking about the ancestors with a structured

mental effort by the living to reach out to the absent forebears and to give them shape and existence Thinking about the ancestors about those who had become distant required active deliberation and meditation qualities that had to be nurtured and learned This study is a history of the early Chinese ancestral cult particularly its cognitive aspects Its goals are to excavate the cult's color and vitality and to quell assumptions that it was no more than a simplistic and uninspired exchange of food for longevity of prayers for prosperity Ancestor worship was not the author contends merely mechanical and thoughtless Rather it was an idea system that aroused serious debates about the nature of postmortem existence served as the religious backbone to Confucianism and may even have been the forerunner of Daoist and Buddhist meditation practices

*Religion and Knowledge* Mathew Guest, Elisabeth Arweck, 2016-04-15 Religions have always been associated with particular forms of knowledge often knowledge accorded special significance and sometimes knowledge at odds with prevailing understandings of truth and authority in wider society New religious movements emerge on the basis of reformulated often controversial understandings of how the world works and where ultimate meaning can be found Governments have risen and fallen on the basis of such differences and global conflict has raged around competing claims about the origins and content of religious truth Such concerns give rise to recurrent questions faced by academics governments and the general public How do we treat statements made by religious groups and on what basis are they made What authorities lie behind religious claims to truth How can competing claims about knowledge be resolved Are there instances when it is appropriate to police religious knowledge claims or restrict their public expression This book addresses the relationship between religion and knowledge from a sociological perspective taking both religion and knowledge as phenomena located within ever changing social contexts It builds on historical foundations but offers a distinctive focus on the changing status of religious phenomena at the turn of the twenty first century Including critical engagement with live debates about intelligent design and the new atheism this collection of essays brings recent research on religious movements into conversation with debates about socialisation reflexivity and the changing capacity of social institutions to shape human identities Contributors examine religion as an institutional context for the production of knowledge as a form of knowledge to be transmitted or conveyed and as a social field in which controversies about knowledge emerge
