Summer Of Hope Serendipity Series Volume 1:

The Serendipity of Hope Simon Lee, Ian S. Markham, 2023-07-07 Institutions are very precious. If any idea is going to persist into the future then it needs an institution to keep it going. Each of us comes to understand often only gradually over the decades how some influences from our earlier life have affected us. Some will have been inspiring. Some will have given us direct models of how to behave or how not to behave. Indeed it is often the case that the deeper an influence turns out to have been in the long run the less likely it is that we noticed it at the time it was happening. For this reason it has become necessary to find the time to reflect on and express gratitude for the institutions that helped form who we are and the work that we do. This collection of essays explores the impact of one institution on twenty five participants twenty five years after we worked together. The Institution was Liverpool Hope University College and is now Liverpool Hope University. By telling and reflecting on our stories we aim to encourage others to think about their own experiences and ultimately our earnest hope is that a greater awareness of this aspect of university life will help to transform our collective understanding of the nature of universities in particular and of communities, institutions or societies in general. But there was something special about belonging to a community called Hope. Must Love Frosting (Must Love Diamonds - book 1) Stacey Joy

Netzel, 2019-05-07 A wedding cake baker and a photographer walk into a bar. No that's just silly. They meet at a wedding of course. And since Asher Diamond only does weddings for the frosting on the cakes it's a match made in heaven. Nope scratch that too. Because Honor Hartman knows Happily Ever After isn't the fairy tale it's cracked up to be no matter how much the sexy photographer makes her wish otherwise. Asher thinks she could be The One and the fact she's the woman behind the butter cream frosting is icing on the cake. When his psychic best friend warns him Honor doesn't believe in forever he's willing to risk his heart to prove to her true love exists until a shocking family secret shakes the foundation of everything he believes in and reveals how wrong it can go if Honor is right. New series. New family. New drama. Must Love Frosting is the first book in Stacey Joy Netzel's brand new Must Love Diamonds series. The Diamonds are the First Family of Colorado. They have money, looks and charisma galore but they don't all have love. Yet. Coming in 2019. 2020 Love Loyal and True book 2 Love You Baby book 3 To Love and Protect book 4 Horsefeathers, 1983 White County, Tennessee Oldest Marriage Book, 1809-1859

Mary Fancher Mitchell, Sharon J. Doliente, 2009-06 White County Tennessee originally encompassed all of what is now Warren County as well as parts of the counties of Cannon, Coffee, De Kalb, Franklin, Grundy, Putnam and Van Buren. The 2,000 marriages in this book as the title indicates are the oldest on record. The marriages are arranged alphabetically by the names of the grooms and furnish the names of brides and officiating ministers along with a number of genealogical annotations.

Experimenting on a Small Planet William W. Hay,2021-09-27 This book is a thorough introduction to climate science and global change The author is a geologist who has spent much of his life investigating the climate of Earth from a time when it was warm and dinosaurs roamed the land to today s changing climate Bill Hay takes you on a journey to understand how the climate system works He explores how humans are unintentionally conducting a grand uncontrolled experiment which is leading to unanticipated changes We follow the twisting path of seemingly unrelated discoveries in physics chemistry biology geology and even mathematics to learn how they led to our present knowledge of how our planet works He explains why the weather is becoming increasingly chaotic as our planet warms at a rate far faster than at any time in its geologic past He speculates on possible future outcomes and suggests that nature itself may make some unexpected course corrections

Although the book is written for the layman with little knowledge of science or mathematics it includes information from many diverse fields to provide even those actively working in the field of climatology with a broader view of this developing drama Experimenting on a Small Planet is a must read for anyone having more than a casual interest in global warming and climate change one of the most important and challenging issues of our time This new edition includes actual data from climate science into 2021 Numerous Powerpoint slides can be downloaded to allow lecturers and teachers to more effectively use the book as a basis for climate change education *Sedimentary structures of ephemeral streams* ,1973-01-01
