Advances on Mechanics, Design Engineering and Manufacturing Benoit Eynard, Vincenzo Nigrelli, Salvatore Massimo Oliveri, Guillermo Peris-Fajarnes, Sergio Rizzuti, 2016-09-02 This book gathers papers presented at the International Joint Conference on Mechanics Design Engineering and Advanced Manufacturing JCM 2016 held on 14-16 September 2016 in Catania Italy. It reports on cutting edge topics in product design and manufacturing such as industrial methods for integrated product and process design, innovative design and computer aided design. Further topics covered include virtual simulation and reverse engineering, additive manufacturing, product manufacturing, engineering methods in medicine and education, representation techniques and nautical, aeronautics and aerospace design and modeling. The book is divided into eight main sections reflecting the focus and primary themes of the conference. The contributions presented here will not only provide researchers, engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work, they are also intended to stimulate new research directions, advanced applications of the methods discussed and future interdisciplinary collaborations.

Drafting Fundamentals for the Entertainment Classroom Eric Appleton, 2021-11-22 Drafting Fundamentals for the Entertainment Classroom: A Process Based Introduction to Hand Drafting. Vectorworks and SketchUp guides students through a syllabus formatted semester of integrated drafting concepts and skills. This book links beginner visualization practices with fundamental software knowledge through step by step exercises and examples. By presenting hand drafting and Vectorworks through incremental exercises, students not only gain an understanding of the tools used in drafting but also learn why the tools, practices and standards exist in the first place. SketchUp, a user friendly 3D modeling program, is integrated into the various exercises to help readers visualize concepts and begin modeling their own ideas. By the end of the book, students will understand drawing construction techniques. United States Institute for Theatre Technology (USITT) recommended graphic standards and the typical drawings created for entertainment design, preparing them to dive more deeply into the further complexities and opportunities of Vectorworks and SketchUp. Drafting Fundamentals for the Entertainment Classroom is written to complement a 14 or 15 week semester of an Entertainment Drafting course. The book's format also provides structure for independent and self-directed study.
