**The Parasite-Stress Theory of Values and Sociality** Randy Thornhill, Corey L. Fincher, 2014-07-17 This book develops and tests an ecological and evolutionary theory of the causes of human values the core beliefs that guide people s cognition and behavior and their variation across time and space around the world We call this theory the parasite stress theory of values or the parasite stress theory of sociality The

evidence we present in our book indicates that both a wide span of human affairs and major aspects of human cultural diversity can be understood in light of variable parasite infectious disease stress and the range of value systems evoked by variable parasite stress. The same evidence supports the hypothesis that people have psychological adaptations that function to adopt values dependent upon local infectious disease adversity. The authors have identified key variables: variation in infectious disease adversity and in the core values it evokes for understanding these topics and in novel and encompassing ways. Although the human species is the focus in the book, evidence presented in the book shows that the parasite stress theory of sociality informs other topics in ecology and evolutionary biology such as variable family organization and speciation processes and biological diversity in general in non-human animals.

**Geriatric Rehabilitation** Jennifer Bottomley, 2024-06-01

As the aging population continues to increase, so does the need for a text specific to the specialized care of the elderly patient as it applies to the physical therapist assistant, student, faculty, and clinician. *Geriatric Rehabilitation: A Textbook for the Physical Therapist Assistant* recognizes the growing role of the PTA in a variety of health care settings, from acute to home to long-term care settings, to name a few. Inside *Geriatric Rehabilitation*, Dr. Jennifer Bottomley, along with her contributors, focuses on the clinically relevant assessment, treatment, and management of the geriatric population. Pathological manifestations commonly seen in the elderly patient are addressed from a systems perspective, as well as a focus on what is seen clinically and how it affects function. Each pathological area covered includes screening, assessment, and evaluation; treatment prescription; goal setting; modification of treatment; anticipated outcomes; psychosocial, pharmacological, and nutritional elements. The organization and presentation of the practical, hands-on components of interventions, assessments, and decision-making skills make this a go-to text for the PTA to administer comprehensive geriatric care at each point along the continuum of care. Some of the features inside include emphasis on treatment interventions, techniques, tips, and options; focus on how assessment tools and treatments are applied and modified to benefit the geriatric population and what the expected outcomes are; clear and outlined chapter objectives; user-friendly summary tables in the nutritional and pharmacology chapters; pearls that highlight important chapter information; appendices and study aids.

*Geriatric Rehabilitation: A Textbook for the Physical Therapist Assistant* answers the call for a text that focuses on the management of geriatric patients across the spectrum of care for the PTA, from students to those practicing in geriatric populations.
