[Liver Myofibroblasts](#) Jiri Kanta, Alena Mrkvicová, Ralf Weiskirchen, 2016-10-25 Myofibroblasts MFB are found in most tissues of the body They have the matrix producing functions of fibroblasts and contractile properties that are known from smooth muscle cells Fundamental work of the last decades has shed remarkable light on their origin biological functions and role in disease During hepatic injury they fulfill manifold functions in connective tissue remodeling and wound healing but overshooting activity of MFB on the other side induces fibrosis and cirrhosis The present e book Liver myofibroblasts contains 9 articles providing comprehensive information on hot topics of MFB In our opening editorial we provide a short overview of the origin of MFB and their relevance in extracellular matrix formation which is the hallmark of hepatic fibrosis Thereafter leading experts in the field share their current perspectives on special topics of i MFB in development and disease ii their role in hepatic fibrogenesis and iii promising therapies and targets that are suitable to interfere with hepatic fibrosis

[Hematopoietic Stem Cells](#) Meng Zhao, Pengxu Qian, 2024-01-17 This book renders a comprehensive understanding of hematopoietic stem cells HSCs from their embryonic development through adult maintenance to aging in the studies conducted in zebrafish and mammals Hematopoiesis provides a paradigm for understanding the development maintenance regeneration aging and malignant transformation of mammalian organs Sitting at the apex of the hematopoiesis hierarchy tree HSCs orchestrate their proliferation self renewal and differentiation to produce all the blood cell lineages throughout life which represents the best example for somatic stem cell studies In this book key regulatory mechanisms for HSC self renewal and differentiation are overviewed in an array of fields including epigenetics metabolism and microenvironment regulation It also highlights the HSC heterogeneity and clonal dynamics from the recent advanced single cell technologies This book elaborates on the research history of HSC studies and reveals how the insights from HSC studies shed light on their clinic application It presents great value from the bench to the clinic

10 Years of Inflammation Pharmacology Paola Patrignani, Dieter Steinhilber, 2020-07-07 The past and future of inflammatory pharmacology research a hot topic in health and disease Inflammation is a physiological response to a traumatic injury bacterial or viral infection However if not appropriately controlled it contributes to a long list of diseases including asthma atherosclerosis multiple sclerosis arthritis and cancer

Different are the types of inflammatory responses Acute inflammation is an immediate body response to the cellular damage induced by pathogens noxious stimuli or physical injury it is a short term response resulting in healing via time dependent changes of leukocyte functions First a leukocytes infiltration happens within the damaged region with the purpose of eliminating the stimulus and repairing the tissue Chronic inflammation by contrast is a prolonged and dysregulated response where the active inflammation contributes both to tissue destruction and to the development of many chronic human conditions and diseases In the context of exaggerated inflammation which occurs as a consequence of severe burns or trauma the body response called sepsis can be associated with fatal outcome Increased knowledge of the cellular and molecular mechanisms taking part in the different types of inflammation is a central requirement to develop more effective and safer treatments This is a necessary step to prevent potential severe consequences i e organ failure associated with tissue fibrosis The mission of Inflammation Pharmacology section of Frontiers in Pharmacology is to publish scientifically sound studies that advance our knowledge on different aspects of inflammation and contribute to the development of more effective and safer anti inflammatory agents Within the present eBook are collected the top articles published in the Inflammation Pharmacology section in the last 10 years Some articles explored the roles played by different lipid mediators generated from arachidonic acid including leukotrienes and prostanoids such as prostacylin and prostaglandin PG F_{2a} in inflammatory conditions Moreover the protectin PD family of specialized pro resolving mediators biosynthesized from the two omega 3 polyunsaturated fatty acids docosahexaenoic acid DHA and n 3 docosapentaenoic acid n 3 DPA were described for their biological effects the G coupled protein receptors pharmacology biosynthesis and medicinal chemistry Some other articles focused on the development of novel strategies to counteract inflammation or to induce its resolution The current concepts and controversies on classification pathogenesis and clinical management of cutaneous adverse events induced by biologic agents used in the treatment of rheumatologic conditions were discussed in another article The whole exome and whole genome sequencing data identifying new and old loci associated with atherosclerosis will lead to discovering new molecular targets for blocking atherosclerosis even in its early stages This critical issue was reviewed in another paper Numerous information on an individual clinical condition is held in their platelet derived microparticles MPs the assessment of their number and size together with their content can represent the signature to acquire diagnostic information and to monitor the efficacy of therapeutic agents Some other articles discussed the role of fibroblasts in the development of fibrosis and potential therapies under investigation It was enlightened the role of the activation and transdifferentiation of hepatic stellate cells HSCs into contractile matrix producing myofibroblasts MFBs as central events in hepatic fibrogenesis and summarized the current strategies for targeted delivery of drugs to pro fibrogenic liver cells including the development of therapeutics specifically targeting HSCs Continued in eBook
