Reexamining Academic Freedom in Religiously Affiliated Universities Kenneth Garcia, 2016-12-21 Kenneth Garcia presents an edited collection of papers from the 2015 conference on academic freedom at religiously affiliated universities held at the University of Notre Dame. These essays reexamine the secular principle of academic freedom and discuss how a theological understanding might build on and further develop it. The year 2015 marked the 100th anniversary of the founding of the American Association of University Professors (AAUP), the leading advocate of academic freedom in America. In October 2015, the University of Notre Dame convened a group of prominent scholars to consider how the concept and practice of academic freedom might evolve. The premise behind the conference was that the current conventional understandings of academic freedom are primarily secular and therefore not yet complete. The goal was to consider alternative understandings in light of theological insight. Theological insight in this context refers to an awareness that there is a surplus of knowledge and meaning to reality that transcends what can be known through ordinary disciplinary methods of inquiry, especially those that are quantitative or empirical. Essays in this volume discuss how, in light of the fact that findings in many fields hint at connections to a greater whole, scholars in any academic field should be free to pursue those connections. Moreover, there are religious traditions that can help inform those connections.

Sovereign Mars Jacob Haqq-Misra, 2022-11-09 The goal of sending humans to Mars is becoming increasingly technologically feasible, but the prospect of space colonization raises important questions about civilizational ethics and collective morality. History shows how destructive colonialism has been, resulting in centuries-long struggles to achieve liberation from the violent competition for land and resources by colonial powers. Space settlement poses the same temptation on a cosmic scale, with commercial actors and government space agencies doing the work previously carried out by European empires. The question is whether humans will take a different approach in this new frontier. In *Sovereign Mars*, astrobiologist Jacob Haqq-Misra argues that settling Mars offers humankind a transformative opportunity to avoid the mistakes of the past by liberating Mars as a sovereign planet from the start. Rather than see space as a way to escape human problems on Earth, Mars presents humanity with a challenge to address these problems by thinking carefully about the theory and practice of civilization. Drawing on past examples of cooperative sovereignty, such as the Outer Space Treaty of 1967, the United Nations Law of the Sea Conventions, and the Antarctic Treaty System, Haqq-Misra begins a conversation about governance in space well in advance of the first arrival of humans on Mars and makes the case for an analogous approach to space that will preserve the space environment and benefit future generations. Haqq-Misra examines the emergence of sovereignty in space through the lens of historical precedent on Earth and develops models of shared governance that could maximize the transformative potential of Mars settlement. *Sovereign Mars* proposes the planet would serve humankind best as an independent planetary state, a juridical peer to Earth, to enable new experiments in human

civilization and develop a pragmatic model for shared governance on Mars
