 Parents who are also educational researchers have access to a domain that is highly complex and not always available to
 other scholars In this book parent researchers provide theoretical and practical insights into children's learning in the home
 and at school Readers are given a window into learning in the home context and how all family members organize or engage
 in that learning Working on two levels the book develops scholarly discussions about learning in the home how is it organized
 who the participants are and what children are learning and it illustrates the impacts that outside institutions in particular
 schools have on families It is unique in showcasing parent research as a type of research paradigm with particular aspects
 and challenges Both teachers and researchers can learn from these studies as they show the impact that schooling has on
 families and how institutional discourses and beliefs can both positively and negatively affect the dynamics of any family
