Whatsapp Mastery for Grandpas Mateen Soudagar,2015-12-07 I have been using WhatsApp for a long time to communicate with my friends WhatsApp began in 2009 when a few phone apps were competing to gain a significant share of the user base Back then the concept was still rather new to me I never thought it would reach as many users as it has now Earlier this year in March 2015 my mother travelled to India and was able to meet with her family Many of them were avid users of WhatsApp and convinced Mom to get it After she had got back from India she convinced my dad to get it too Now they send messages videos and text to everyone anywhere and they've become more adept at using it than I am The most beautiful thing about WhatsApp is that it has not only simplified phone communication between users but also made things so simple that our older generation will find it easy to understand and use These days most apps and software are tailored to younger folk who have been using technology all their lives It's great that some newer companies like WhatsApp are tailoring their interface and features for all ages This eBook covers everything you need to know and more about WhatsApp It will get you up to speed with what everyone else knows about WhatsApp and get you using it just as well as they do Plus it will have you knowing things about WhatsApp that not many other people know This book is written to take you from knowing nothing about WhatsApp to knowing everything and more You can take what you want and apply it accordingly WhatsApp and most

The idea of this study is to create Mobile Immersion on smartphone using Instant Messenger WhatsApp. 45 Form 1 7th Grade students participated in a 3 month experiment. They were divided into two big groups: one with Mobile Immersion (Mobile Group) and the other without (Control Group). A vocabulary list of 200 high frequency verbs was the main learning material. Net Gain in vocabulary score between pre-test and post-test was used to measure their learning progress. The statistics show no significant difference between the two groups' means. However, within Mobile Group there is significant correlation between individual's chat frequency and vocabulary gain. Furthermore, chat histories of participants reveal a possible theme that has implications for researchers and educators. A questionnaire is also used to survey participants' attitudes towards the Mobile Immersion. This paper shares the experience from the case study and draws insights into a new direction contributing to the knowledge base of Second Language Acquisition and Mobile Assisted Language Learning. DOI: 10.5353/th_b5396453 Subjects: Second language acquisition, Computer assisted instruction.
