Chicago Daniel R. Block, Howard B. Rosing, 2015-09-03 Chicago began as a frontier town on the edge of white settlement and as the product of removal of culturally rich and diverse indigenous populations The town grew into a place of speculation with the planned building of the Illinois and Michigan canal a boomtown and finally a mature city of immigrants from both overseas and elsewhere in the US In this environment cultures mixed first at the taverns around Wolf Point where the forks of the Chicago River join and later at the jazz and other clubs along the Stroll in the black belt and in the storefront ethnic restaurants of today Chicago was the place where the transcontinental railroads from the West and the trunk roads from the East met Many downtown restaurants catered specifically to passengers transferring from train to train between one of the five major downtown railroad stations This also led to destination restaurants where Hollywood stars and their onlookers would dine during overnight layovers between trains At the same time Chicago became the candy capital of the US and a leading city for national conventions catering to the many participants looking for a great steak and atmosphere Beyond hosting conventions and commerce Chicagoans also simply needed to eat safely and relatively cheaply Chicago grew amazingly fast becoming the second largest city in the US in 1890 Chicago itself and its immediate surrounding area was also the site of agriculture both producing food for the city and for shipment elsewhere Within the city industrial food manufacturers prospered highlighted by the meat processors at the Chicago stockyards but also including candy makers such as Brach's and Curtiss and companies such as Kraft Foods At the same time large markets for local consumption emerged The food biography of Chicago is a story of not just culture economics and innovation but also a history of regulation and regulators as they protected Chicago's food supply and built Chicago into a city where people not only come to eat but where locals rely on the availability of safe food and water With vivid details and stories of local restaurants and food Block and Rosing reveal Chicago to be one of the foremost eating destinations in the country

Chicago, 2007 **Retail Geography (RLE Retailing and Distribution)** John Dawson, 2012-10-02 Studies of the organisation and location of retailing activity have played a central role in the emergence of urban geography as a major area of academic study Moreover retailing is increasingly the focus of interdisciplinary research with economists sociologists psychologists and marketing specialists all contributing This book surveys and sets in context the wide range of research

work that has recently been done on retailing It concentrates on western industrial societies particularly Britain and the USA and considers empirical research theory and theoretical applications Topics covered include location analysis which is a traditional area of academic interest consumer behaviour which is of particular interest to psychologists and retail organisation and government involvement which will interest all those concerned especially those actually involved in retail planning and management This comprehensive book is the first substantial review of research in retail geography and suggests many future lines of research within the field Originally published 1980 *Frommer's Irreverent Guides* Dan Santow, George McDonald, Todd A. Encyclopedia of Consumer Culture Dale Southerton, 2011-09-15 The Encyclopedia of

Consumer Culture is the first reference work to outline the parameters of consumer culture and provide a critical scholarly resource on consumption and consumerism The U.S. City in Transition Barbara Hahn, 2022-07-21 The U S city is undergoing constant change In the East and Midwest most cities were founded as trading posts on waterways They boomed during the industrial era and reached their population peak in the mid 20th century before suburbanization and deindustrialization caused them to decline in importance Traces of decay were everywhere and the prognosis for the future was conceivably poor As Barbara Hahn shows in her book this trend now seems to have been broken Things are looking up again for the US city Some of the former industrial cities have succeeded in structural change In the south and west of the country cities have developed into new growth centers However not all cities are benefiting from this positive development and many continue to shrink at an alarming rate As the author points out similar processes such as neoliberalisation deregulation privatisation and gentrification can be observed in all cities regardless of their location and level of development Due to the large number of didactically prepared graphics the book is suitable as a study read for students and scholars The characteristics of the U S city which are elaborated on the basis of current examples as well as the illustrative photos also illustrate the change of the U S city to the interested reader *Chicago's Industrial Decline* Robert Lewis, 2020-12-15 In Chicago s Industrial Decline Robert Lewis charts the city s decline since the 1920s and describes the early development of Chicago s famed and reviled growth machine Beginning in the 1940s and led by local politicians downtown business interest financial institutions and real estate groups place dependent organizations in Chicago implemented several industrial renewal initiatives with the dual purpose of stopping factory closings and attracting new firms in order to turn blighted property into modern industrial sites At the same time a more powerful coalition sought to adapt the urban fabric to appeal to middle class consumption and residential living As Lewis shows the two aims were never well integrated and the result was on going disinvestment and the inexorable decline of Chicago s industrial space By the 1950s Lewis argues it was evident that the early incarnation of the growth machine had failed to maintain Chicago s economic center in industry Although larger economic and social forces specifically competition for business and for residential development from the suburbs in the Chicagoland region and across the whole United States played a role in the city s industrial decline Lewis stresses the deep incoherence of post WWII economic policy and urban planning that hoped to square the circle by supporting both heavy industry and middle to upper class amenities in downtown Chicago **Right to the Road** Joseph A. Rodriguez, 2024-07-08 Car ownership is central to the U S culture wars about global warming and urban sprawl While the environmental issues surrounding car use are well known the car is also the focus of debates about urban redevelopment racially biased policing women s employment immigration homelessness and disability rights Right to the Road How Marginalized American Motorists Fought to Drive and Park by Joseph A Rodriguez discusses the central role of automobiles to determine how enforced automobile regulations have affected marginalized Americans both in the past and

present day Each chapter focuses on issues such as Milwaukee s parking policies after World War II and urban redevelopment Chicago s traffic and parking policies and the post war rise in crime white and Black women s increased employment post war and the harassment they endured by police officers and motorists the policing of Latino drivers and how anti immigrant activists sensationalized automobile accidents to demonize Latinos as criminals the disabled communities push for driving rights the debates in cities and suburbs over the right to park overnight in safe parking spaces and the use of the automobile and parking lots during the COVID 19 pandemic This book highlights the various roles of the car in society throughout history
