

Climate Risk Screening and Management Tool

For use in project design

Purpose: This tool guides USAID project planners and support staff through the process of assessing and addressing climate-related risks. This process will help to ensure effectiveness and sustainability of project objectives in the face of **climate variability and change**.  The output of this tool provides information for the table required in [Climate Risk Management for USAID Projects and Activities: A Mandatory Reference for AID Chapter 201](#).

Structure: The tool guides you through the steps shown to the right. For additional information, you will find purple pop-ups with definitions and yellow pop-ups with examples throughout the tool.

Additional Resources: This tool should be used in conjunction with climate information, such as these country-specific [climate risk profiles](#), which describe climate stressors and the major types of risks that climate change poses to each country. Additional resources can be found in [the annex](#) of this tool and on [ClimateLink](#).

Climate change impacts different groups differently. All analysis using this tool should reflect a commitment to social inclusion that considers the different societal roles, needs, constraints, and opportunities of individuals and groups based on their identities, including gender, age, sexual orientation, disability status, linguistic status, and ethnicity - particularly **marginalized populations**.
