

US Army Corps of Engineers

Semper Tek's Team has successfully delivered several Design-Build projects for USACE & other Federal Clients over the last 5 years. The Design-Build project scopes ranged in complexity and value for single project between \$150K to \$8M.

DESIGN-BUILD PROGRAM

The Semper Tek Team works together from start to finish, in open communication with the Owner, to deliver otherwise unachievable results. The best logical solutions are conceived when all stakeholders are in collaboration, resulting in minimized cost, schedules streamlined and efficiencies realized with the quality results. *It's the best return on investment!*

Design-Build

Reduce 15% or more off the project time-line by incorporating the construction team early on in the design process. Less documentation is needed and the Construction Phase can begin much earlier.

Control Cost towards SOW & Cost Reduction can be achieved by the continuous analysis of cost options that parallels the Design Packages. Cost can be controlled early enough in order to meet the project budget.

PROJECT RISK FACTORS

TIME

COST

DBB

Longer Project Time-lines to accommodate 3 sequential phases: Design, Bid, Construction. Adds Risk to breakdown in communication.

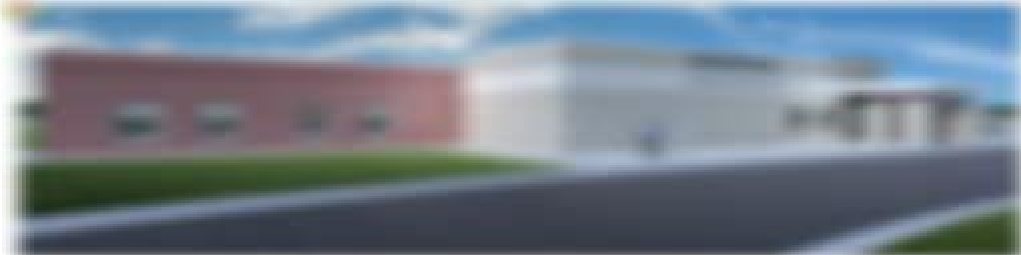

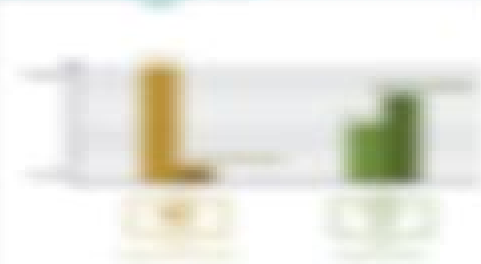

Low-Cost Setbacks such as less experienced and low quality bidders can affect the project. Eliminates cost verification during Design Phase.

Quality Assurance

Quality Assurance is a critical component of the Design-Build process. It ensures that the project meets the required standards and specifications. The Design-Build team is responsible for implementing a robust Quality Assurance program throughout the project lifecycle.

Communication

Effective communication is essential for the success of any project. The Design-Build team must maintain open lines of communication with the Owner and all stakeholders. Regular meetings and reporting are key to ensuring that everyone is on the same page and that any issues are addressed promptly.
