An Integrated Formal Task Specification Method for Smart Environments Maik Wurdel, 2011 This thesis is concerned with the development of interactive systems for smart environments One of the characteristic of smart environments is the need to support different interaction paradigms at runtime On the one hand interaction is performed explicitly the user performs an action in order to interact with the system e.g. pressing a button to adjust the light On the other hand actions of the user are interpreted by the smart environment even though they have not been performed primarily to interact with the system implicit interactions e.g. walking to the speaker's desk to give a talk A smart environment tries to infer those interactions to assist the user in her work e.g. display slides at the projection canvas Both interaction paradigms originate from different research fields and are currently treated independently although implicit and explicit interaction mutually influence each other and occur interleaved The thesis introduces a task modeling language in order to cope with the given requirements of smart environments which can be used to perform interaction development for smart environments in a model based fashion for both interaction paradigms

The American Middle Class Robert S. Rycroft, 2017-05-12 What is the American Dream This book's author argues that contrary to what many believe it is not achieving the wealth necessary to enter the top one percent but rather becoming members of the great middle class by dint of hard work and self discipline Americans of all classes consider themselves to be middle class There are Americans who by any objective standard should be considered poor who would insist they are middle class just as other Americans who should be considered wealthy also insist they are middle class Thinking of yourself and being thought of by others as middle class is the American Dream for tens of millions of people But an enduring problem of the American middle class is the worry that the Dream is coming apart that forces are lurking in the shadows waiting to steal their progress and throw them back into poverty This thought

provoking reference explores a disparate multitude of issues associated with being middle class in America. It addresses a range of questions and subtopics including the meaning of the term middle class, how middle class status is expressed by both the majority and the various minorities that make up the American mosaic, what economic pressures are bearing down on the middle class and how economists and others attempt to make sense of the economic issues of the day. Readers will also better understand how political institutions and public policies are shaping the way the middle class views the world, how labor, housing, education and crime related issues have influenced the development and growth of the middle class, the norms of the middle class versus those of other classes in society and the role of culture and media in shaping how members of the middle class view themselves and how they are viewed by others. This two volume set provides a comprehensive look at the American middle class that supports student research in economics, social studies, cultural studies and political history. The content supports teachers in their development of lesson plans and assignments that directly align with the Common Core State Standards and the recommendations of the National Curriculum Standards for Social Studies (NCSS) with respect to all ten NCSS themes.

Smart Thinking Tony Lewin, 2004. The story of smart is an epic tale of genius, inspiration, hope, disappointment, disaster and ultimate triumph. Funky, stylish and fun, smart is the youngest and most exciting brand of car on the market and it has revolutionised the way we think about cars and the way we use them. It has put much needed fun back into driving and even city motorists smile when they're at the wheel of a smart. But it nearly didn't happen at all. The revolutionary design was the product of the genius who invented the Swatch watch, saving the near bankrupt Swiss watch industry in the process. But these visionary ideas proved too radical and the tiny two seater almost died at birth when a succession of backers lost their nerve. The sensational story of smart traces the decade long history of this ambitious project, talking to key figures from every stage of the programme and building a vivid picture of an idea ahead of its time. **A**
