grounded in values purpose and practice Too often we romanticize the future city glass towers flying cars machines and robots everywhere data driven dreams But these visions distract us from the urgency of the present They bypass the real work of transformation by projecting change onto an abstract tomorrow The Advanced City asks something deeper What kind of cities are we actively creating today here and now It is not about waiting for innovation to arrive It is about choosing a different path rooted in responsibility equity and long view thinking This book is not about cities as machines markets or spectacles It is about cities as ecosystems of meaning struggle creativity and care The Advanced City is a movement of re engagement for academics for planners for civic leaders and for all who call the city home It calls on us to be co creators of our urban futures not passive consumers of predesigned and predetermined solutions We need radical honesty about the failures of current systems and the intellectual courage to reimagine what s possible The advanced city resists the illusion of smartness and returns us to human truths interdependence justice and purpose It is about making change not waiting for it So this is not a new product for urban branding it is rather a process for transformation a paradigm shift and an urban revolution A call to co create cities that are not merely advanced in function but advanced in wisdom Here I also call for the development of Brother Cities and Advanced Development Goals ADGs If not now when If not us who Let the Advanced City be an urban revolution of now and the future to be lived not later but now not for the future cities but for the future of our cities and communities
