Global Supply Chains in the Pharmaceutical Industry Nozari, Hamed, Szmelter, Agnieszka, 2018-11-09. In a rapidly growing global economy where there is a constant emergence of new business models and dynamic changes to the business ecosystem, there is a need for the integration of traditional, new and hybrid concepts in the complex structure of supply chain management. Within the fast-paced pharmaceutical industry, product strategy, life cycles and distribution must maintain the highest level of agility. Therefore, organizations need strong supply chain capabilities to profitably compete in the marketplace. Global Supply Chains in the Pharmaceutical Industry provides innovative insights into the efforts needed to build and maintain a strong supply chain network in order to achieve efficient fulfillment of demand, drive outstanding customer value, enhance organizational responsiveness and build network resiliency. This publication is designed for supply chain managers, policymakers, researchers, academicians and students and covers topics centered on economic cycles, sustainable development and new forces in the global economy.

**Design, Analysis and Applications of Renewable Energy Systems** Ahmad Taher Azar, Nashwa Ahmad Kamal, 2021-09-09. Design Analysis and Applications of Renewable Energy Systems covers recent advancements in the study of renewable energy control systems by bringing together diverse scientific breakthroughs on the modeling, control and optimization of renewable energy systems as conveyed by leading energy systems engineering researchers. The book focuses on present novel solutions for many problems in the field, covering

modeling control theorems and the optimization techniques that will help solve many scientific issues for researchers Multidisciplinary applications are also discussed along with their fundamentals modeling analysis design realization and experimental results This book fills the gaps between different interdisciplinary applications ranging from mathematical concepts modeling and analysis up to the realization and experimental work Presents some of the latest innovative approaches to renewable energy systems from the point of view of dynamic modeling system analysis optimization control and circuit design Focuses on advances related to optimization techniques for renewable energy and forecasting using machine learning methods Includes new circuits and systems helping researchers solve many nonlinear problems
