

TRACE-PRO™

COMPACT, RUGGEDISED EXPLOSIVES TRACE DETECTOR

Feature Highlights

- Fast, accurate answers within 15 seconds
- Non-radioactive IBS technology
- Unique probe-based sampling technique; no gloves or swab line
- On-board camera and GPS for evidence collection
- Only explosives detector using commercial AA batteries

Military, Emergency Response, Law Enforcement, and Security professionals face the challenge of detecting traces of explosives from multiple surfaces and locations — everyday. They need fast, accurate results to indicate if a person or object has been in contact with an explosive substance.

TRACE-PRO is a non-radioactive explosives trace detector designed to make it quick and easy to collect and analyse samples from suspect goods, materials or people.

TRACE-PRO is ready to go in less than three minutes and can detect and identify common explosives in seconds.

TRACE-PRO's unique IBS user design protects the system from contamination, providing the fastest clear down of any explosives trace detector in its class. This significantly increases the number of

samples which can be analysed, providing a more efficient screening operation.

Thanks to the revolutionary probe-based sampling inside technique, TRACE-PRO doesn't need gloves, swabs sticks or difficult to open lids. Swabs are quick and easy to replace and designed for multiple use.

An exclusive integrated evidence collection package provides further information, such as time/date stamp, complete alarm data, photographs, and GPS coordinates, all collected in a single file. Data can be downloaded from the unit by USB connection, providing an easy and secure way to store and access vital information for use against potential suspects.

The intuitive user interface is simple to understand and operate, providing the user through visual symbols, animations and alarms.

through the topic of physical security with a unique detailed and scientific approach The book describes the entire
vulnerability assessment VA process from the start of planning through final analysis and out brief to senior management It
draws heavily on the principles introduced in the author s best selling Design and Evaluation of Physical Protection Systems
and allows readers to apply those principles and conduct a VA that is aligned with system objectives and achievable with
existing budget and personnel resources The text covers the full spectrum of a VA including negotiating tasks with the
customer project management and planning of the VA team membership and step by step details for performing the VA data
collection and analysis It also provides important notes on how to use the VA to suggest design improvements and generate
multiple design options The text ends with a discussion of how to out brief the results to senior management in order to gain
their support and demonstrate the return on investment of their security dollar Several new tools are introduced to help
readers organize and use the information at their sites and allow them to mix the physical protection system with other risk
