web opentraffyclab is a matlab environment capable of simulating simple traffic scenarios with vehicles and junction controllers the simulator provides models for human drivers and traffic lights but is designed so that users can specify their own control logic both for vehicles and traffic signals

**traffic sign detection and recognition matlab simulink** - May 12 2023

web this example shows how to generate cuda mex code for a traffic sign detection and recognition application that uses deep learning traffic sign detection and recognition is an important application for driver assistance systems aiding and providing information to the driver about road signs

road traffic detection using rcnn with matlab code car detection - Aug 03 2022

web the purpose of this study is to successfully train our vehicle detector using r cnn faster r cnn deep learning methods on a sample vehicle data sets and to optimize the success rate of the trained detector by providing efficient results for vehicle detection by testing the trained vehicle detector on the test data
