Enlightenment against Empire Sankar Muthu, 2009-01-10 Inspired by a more multifaceted view of the Enlightenment

Muthu looks at a forgotten legacy from this period its anti imperialism Gregory Jusdanis Research in African Literatures In the late eighteenth century an array of European political thinkers attacked the very foundations of imperialism arguing passionately that empire building was not only unworkable costly and dangerous but manifestly unjust Enlightenment Against Empire is the first book devoted to the anti imperialist political philosophies of an age often regarded as affirming imperial ambitions Sankar Muthu argues that thinkers such as Denis Diderot Immanuel Kant and Johann Gottfried Herder developed an understanding of humans as inherently cultural agents and therefore necessarily diverse These thinkers rejected the conception of a culture free natural man They held that moral judgments of superiority or inferiority could be made neither about entire peoples nor about many distinctive cultural institutions and practices Muthu shows how such arguments enabled the era s anti imperialists to defend the freedom of non European peoples to order their own societies In contrast to those who praise the Enlightenment as the triumph of a universal morality and critics who view it as an imperializing ideology that denigrated cultural pluralism Muthu argues instead that eighteenth century political thought included multiple Enlightenments He reveals a distinctive and underappreciated strand of Enlightenment thinking that interweaves commitments to universal moral principles and incommensurable ways of life and that links the concept of a shared human nature with the idea that humans are fundamentally diverse Such an intellectual temperament Muthu contends can broaden our own perspectives about international justice and the relationship between human unity and diversity

Teachers and the Epistemology of History Henrik Åström Elmersjö, Paul Zanzanian, 2024-06-25 This edited book explores conceptual as well as empirical approaches to epistemic beliefs that teachers of history might hold In many parts of the world

history teachers are tasked with both upholding historical national myths and at the same time giving students the tools needed to deconstruct history and think critically This ambiguity embedded in the combination of reconstruction and deconstruction is a difficult landscape for teachers to navigate The chapters of this book therefore explore how teachers reason regarding the epistemic nature of history and how this impacts their teaching interpretation of curricula and relationship to their students Contributions consider the implications for prospective history teachers and in service training challenges to the field and point to ways forward The book will be of interest to academics and students of history education as well as practising teachers and museum curators This is an open access book
