Introduction to Design and Analysis of Experiments

George W. Cobb, 1998-03-09. An applied introduction to statistics for students with no background in the subject. The author places a strong emphasis on choosing sound design structures prior to a formal discussion of ANOVA and then goes on to explore real data sets using a variety of graphs and numerical methods before testing the assumptions behind standard ANOVA texts. Throughout the book the author emphasises the contextual understanding and interpretation of data analysis rather than stressing formal deductive mathematical reasoning while the more difficult algebraic discussions are contained in optional sections.

Principles and Practice of Constraint Programming - CP 2004 Mark Wallace, 2004-09-13. The 10th International Conference on the Principles and Practice of Constraint Programming CP 2003 was held in Toronto, Canada during September 27 - October 1, 2004. Information about the conference can be found on the Web at <http://ai.uwaterloo.ca/cp2004/>. Constraint programming (CP) is about problem modelling, problem solving, programming, optimization, software engineering, databases, visualization, user interfaces and anything to do with satisfying complex constraints. It reaches into mathematics, operations research, artificial intelligence, algorithms, complexity modelling and programming languages and many aspects of computer science. Moreover, CP is never far from applications and its successful use in industry and government goes hand in hand with the success of the CP research community. Constraint programming continues to be an exciting, flourishing and growing research field. As the annual CP conference proceedings amply witness, this year from 158 submissions we chose 46 to be published in full in the proceedings. Instead of selecting one overall best paper, we picked out four distinguished papers, though we were tempted to select at least 12 such papers. In addition, we included 16 short papers in the proceedings; these were presented as posters at CP 2004. This volume includes summaries of the four invited talks of CP 2004. Two speakers from industry were invited. However, these were no ordinary industrial representatives but two of the

leading researchers in the CP community Helmut Simonis of Parc Technologies until its recent takeover by Cisco Systems and Jean Francois Puget Director of Optimization Technology at ILOG The other two invited speakers are also big movers and shakers in the research community
