Nowcashing: Using Daily Fiscal Data for Real-Time Macroeconomic Analysis Florian Misch, Mr. Brian Olden, Marcos Poplawski-Ribeiro, Lamya Kejj, 2017-11-06 Traditionally fiscal data for policy analysis are derived from official reports that depending on the country are published either monthly quarterly or annually often with significant time lags However innovations in digitalization of government payments and accounting systems mean that real time daily fiscal data exist in many countries In this paper we argue that these data contain valuable but underutilized and underexploited information Possible uses include i realtime fiscal surveillance which allows for much more timely responses to emerging signs of fiscal stress and ii nowcasting economic activity which is especially useful in countries where higher frequency GDP statistics are unavailable

Integrative Sport and Exercise Nutrition Ian Craig, Justin Roberts, 2025-09-17 Integrative Sport and Exercise Nutrition A

Health Feeds Performance Perspective defines health as an underpinning requirement for active pursuit and sporting performance. By focusing on the empowerment of scientists and practitioners who support such individuals, this new textbook powerfully disseminates academic and experiential knowledge in a thoroughly applied context. The prevailing paradigm that has existed within the academic enquiry of sports nutrition has typically viewed macronutrients as fuel for exercise endeavours. While this notion provides a basis of quantitative nutritional support, what happens when our active individual lacks adequate digestive health to assimilate these foods and in the process creates an inflammatory tone in their body? And what happens when our aspiring athlete is genetically not suited to the diet that is prescribed by the sports nutritionist, which is based merely on the energetic needs of their sport? The underlying aim of Integrative Sport and Exercise Nutrition is to encourage sport, exercise, and nutrition professionals, academics, and students to embrace the physiological complexity and individuality of an exercising person. This approach highlights the need to go beyond traditional macronutrient approaches dominant in this field and consider how our food impacts physiological health from an integrative body systems perspective. Within the context of heavy training loads often alongside significant life stressors, such practitioners can support the robust health and performance requirements of active individuals. This cutting edge book thereby brings together the scientific voice of academics with the real world experience of nutrition and exercise practitioners, and by doing so, the authors wish to stimulate a new paradigm of thought towards integrative and personalised thinking in sport and exercise.

Pierre Werner and Europe Elena Danescu, 2019-02-01. This book, which features a foreword by Jean Claude Juncker and a Preface by Professor Harold James, examines the European vocation and achievements of Pierre Werner (1913-2002), former Prime Minister, Finance Minister, and Foreign Minister of Luxembourg, unanimously recognized as one of the architects of Economic and Monetary Union. The author makes extensive use of Pierre Werner's previously unpublished archives belonging to the Werner family, opened for the first time for research purposes. The book analyses the Werner Report negotiations within the Werner Committee, the emergence of the Committee's views on EMU, their political commitment to a European currency, the similarities and differences between their ideas, their personal networks, the influence of the states they represented, their theoretical and methodological input, and their contribution to the political consensus. Chapters shed new light on various aspects of the European integration process and also on the role of Luxembourg and its European policy. In addition, the author has carried out a series of original interviews with Luxembourg and European figures who share their memories and thoughts concerning Pierre Werner, his achievements, and his views on the European integration process, and also other topics such as Economic and Monetary Union and Luxembourg's European policy. This book will be of interest and value to researchers, EU policy makers, and students in the fields of political economy, political science, economic history, and history of economic thought.
