Integral Ubuntu Leadership Passmore Musungwa Matupire, 2016-10-04 The four worlds as we know them today the North West South and East are out of balance The West and the North generally dominate on a global scale while the South and the East lag behind This also happens at individual societal and organisational levels It is clear that there is a need to change the way we lead our organisations in business and the way we think about leading in politics Here is a comprehensive exploration of the Integral Leadership challenges of the twenty first century The author combines the African philosophy of Ubuntu or humanness the cornerstone of African thought and life with the concept of Integral Leadership with particular reference to Lessem and Schieffer s combining in their 2010 book *Integral Research and Innovation of nature and community culture and spirituality science and technology and politics and economies* This connectedness in the new paradigm of wholeness and relatedness goes beyond the relationships of human beings alone and involves experiences with nature and community Leadership is viewed from an indigenous and exogenous perspective bringing together a newly Integral approach which will also introduce industry ecology and knowledge ecology as an evolution of the Ubuntu philosophy The author offers a unique forum through which to commit to paper the operationalisation of the Integral Ubuntu Leadership model in catalysing development efforts and in CARE ing for communities and societies

Natural Capital Peter Kareiva, 2011-04-07 In 2005 The Millennium Ecosystem Assessment MA provided the first global assessment of the world s ecosystems and ecosystem services It concluded that recent trends in ecosystem change threatened human wellbeing due to declining ecosystem services This

bleak prophecy has galvanized conservation organizations ecologists and economists to work toward rigorous valuations of ecosystem services at a spatial scale and with a resolution that can inform public policy The editors have assembled the world s leading scientists in the fields of conservation policy analysis and resource economics to provide the most intensive and best technical analyses of ecosystem services to date A key idea that guides the science is that the modelling and valuation approaches being developed should use data that are readily available around the world In addition the book documents a toolbox of ecosystem service mapping modeling and valuation models that both The Nature Conservancy and the World Wide Fund for Nature WWF are beginning to apply around the world as they transform conservation from a biodiversity only to a people and ecosystem services agenda The book addresses land freshwater and marine systems at a variety of spatial scales and includes discussion of how to treat both climate change and cultural values when examining tradeoffs among ecosystem services
