Christian Theological Education and the Response to the Crisis in Zimbabwe Bekithemba Dube, Gift Masengwe, 2025-10-02 The book offers an incisive examination of the governing philosophy of the Zimbabwe African National Union Patriotic Front ZANU PF referred to as Zanupfism characterizing it as marked by callousness and malevolence towards dissenting voices from civil society and opposition factions This pernicious application of power extends beyond mere verbal aggression to encompass militaristic actions engendering a profound generational crisis within Zimbabwe The contributors explore the compelling juxtaposition between President Emmerson Mnangagwa and the biblical Nebuchadnezzar II a ruler notorious for his autocratic reign and expansive ambitions Further critically scrutinizing the complicity of neo Pentecostal prophets in the book reveals how these religious figures promote an esoteric understanding of the divine diverging from a theology rooted in justice thereby enabling the oppressive regime's practices This critique underscores the imperative for prophets to recalibrate their theological perspectives urging them to move beyond magical interpretations of faith toward an authentic engagement with a personal God who champions justice The book further encompasses the complex interplay of political and religious narratives examining how church leaders either bolster or undermine Mnangagwa's political ideology highlighting the tendency among certain religious factions to deify political authority ultimately exacerbating societal inequities In advocating for a transformative theological discourse in Zimbabwe the book asserts that religious narratives must serve as instruments for fostering democracy social justice and equity rather

than sustaining a status quo that entrenches authoritarian governance The necessity for unified principled resistance grounded in the collective agency of the populace emerges as a salient theme in the quest for meaningful political and social reform

War by Other Means Robert D. Blackwill, Jennifer M. Harris, 2016-04-11 A Foreign Affairs Best Book of 2016

Today nations increasingly carry out geopolitical combat through economic means Policies governing everything from trade and investment to energy and exchange rates are wielded as tools to win diplomatic allies punish adversaries and coerce those in between Not so in the United States however America still too often reaches for the gun over the purse to advance its interests abroad The result is a playing field sharply tilting against the United States Geoeconomics the use of economic instruments to advance foreign policy goals has long been a staple of great power politics In this impressive policy manifesto Blackwill and Harris argue that in recent decades the United States has tended to neglect this form of statecraft while China Russia and other illiberal states have increasingly employed it to Washington's disadvantage G John Ikenberry Foreign Affairs A readable and lucid primer The book defines the extensive topic and opens readers eyes to its prevalence throughout history Presidential candidates who care more about protecting American interests would be wise to heed the advice of *War by Other Means* and take our geoeconomic toolkit more seriously Jordan Schneider Weekly Standard *Intellectual, Scientific, and Educational Influences on Sustainability Research* Turvey, Rosario Adapon, Kurissery, Sreekumari, 2019-06-28

Innovation, Regional Integration, and Development in Africa Samuel Ojo Oloruntoba, Mammo Muchie, 2018-07-26 This edited volume discusses the role of innovation and regional integration in economic development in Africa Over the past five decades post colonial African countries have struggled to break loose from the trap of poverty and underdevelopment through the adoption of various development strategies at regional national and continental levels However the results of both national and regional efforts at advancing development on the continent have been mixed Although the importance of agglomeration and fusion of institutions have long been recognized as possible path to achieving economic development in Africa the approach to regionalism has been unduly focused on market integration while neglecting other dimensions such as social policy mobility of labor educational policy biotechnology regional legislation manufacturing innovation and science and technology This volume investigates the link between innovation regional integration and development in Africa arguing that the immediate and long term development of Africa lies not just in the structural transformation of its economies but in the advancement of scientific and innovation capacities The book is divided into four parts Part I addresses the theoretical and conceptual underpinnings of innovation and regional integration in Africa Part II presents case studies which examine how regional economic institutions are fostering innovation in Africa Part III of the book deals with sectoral issues on innovation and integrated development in Africa Part IV sets the future research on innovation

UNESCO,2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis

on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover Displacement Economies in Africa Amanda Hammar,2014-05-08
