Christian Theological Education and the Response to the Crisis in Zimbabwe Bekithemba Dube, Gift Masengwe, 2025-10-02 The book offers an incisive examination of the governing philosophy of the Zimbabwe African National Union Patriotic Front ZANU PF referred to as Zanupfism characterizing it as marked by callousness and malevolence towards dissenting voices from civil society and opposition factions This pernicious application of power extends beyond mere verbal aggression to encompass militaristic actions engendering a profound generational crisis within Zimbabwe The contributors explore the compelling juxtaposition between President Emmerson Mnangagwa and the biblical Nebuchadnezzar II a ruler notorious for his autocratic reign and expansive ambitions Further critically scrutinizing the complicity of neo Pentecostal prophets in the book reveals how these religious figures promote an esoteric understanding of the divine diverging from a theology rooted in justice thereby enabling the oppressive regime's practices This critique underscores the imperative for prophets to recalibrate their theological perspectives urging them to move beyond magical interpretations of faith toward an authentic engagement with a personal God who champions justice The book further encompasses the complex interplay of political and religious narratives examining how church leaders either bolster or undermine Mnangagwa's political ideology highlighting the tendency among certain religious factions to deify political authority ultimately exacerbating societal inequities In advocating for a transformative theological discourse in Zimbabwe the book asserts that religious narratives must serve as instruments for fostering democracy social justice and equity rather

than sustaining a status quo that entrenches authoritarian governance The necessity for unified principled resistance grounded in the collective agency of the populace emerges as a salient theme in the quest for meaningful political and social reform

War by Other Means Robert D. Blackwill, Jennifer M. Harris, 2016-04-11 A Foreign Affairs Best Book of 2016

Today nations increasingly carry out geopolitical combat through economic means Policies governing everything from trade and investment to energy and exchange rates are wielded as tools to win diplomatic allies punish adversaries and coerce those in between Not so in the United States however America still too often reaches for the gun over the purse to advance its interests abroad The result is a playing field sharply tilting against the United States Geoeconomics the use of economic instruments to advance foreign policy goals has long been a staple of great power politics In this impressive policy manifesto Blackwill and Harris argue that in recent decades the United States has tended to neglect this form of statecraft while China Russia and other illiberal states have increasingly employed it to Washington's disadvantage G John Ikenberry Foreign Affairs A readable and lucid primer The book defines the extensive topic and opens readers eyes to its prevalence throughout history Presidential candidates who care more about protecting American interests would be wise to heed the advice of *War by Other Means* and take our geoeconomic toolkit more seriously Jordan Schneider Weekly Standard

Making Politics in Zimbabwe's Second Republic Gordon Moyo, Kirk Helliker, 2023-05-16 The book provides a fresh and innovative interpretation of the new government of Zimbabwe led by Emmerson Mnangagwa which emerged in late 2017 after the downfall of Robert Mugabe It demonstrates the contradictory character of the Mnangagwa government involving both continuities and discontinuities in relation to Mugabe's regime The temptation amongst Zimbabwean scholars has been to focus on the continuities and to dismiss the significance of any discontinuities notably reform measures This book adopts an alternative approach by identifying and focusing specifically on the existence of a formative project of the Mnangagwa's Second Republic further analysing its political significance as well as risks and limitations While doing so the book covers topics such as reform measures reconciliation transitional justice corruption the media agriculture devolution and the debt crisis as well as health and education Discussing the limitations of these different reform measures the book highlights that any scholarly failure to identify the risks of the project leads to an incomplete understanding of what constitutes the Mnangagwa's Second Republic The book appeals to students scholars and researchers of Zimbabwean and African studies political science and international relations as well as policymakers interested in a better understanding of political reform processes

Blood Oil Leif Wenar, 2015-12-02 Natural resources like oil and minerals are the largest source of unaccountable power in the world Petrocrats like Putin and the Saudis spend resource money on weapons and oppression militants in Iraq and in the Congo spend resource money on radicalization and ammunition Resource fueled authoritarians and extremists present endless crises to the West and the source of their resource power is ultimately ordinary consumers doing their everyday shopping at the gas station and the mall In this sweeping new book one of today s leading political philosophers Leif Wenar goes behind the headlines in search

of the hidden global rule that thwarts democracy and development and that puts shoppers into business with some of today's most dangerous men Wenar discovers a rule that once licensed the slave trade and apartheid and genocide a rule whose abolition has marked some of humanity's greatest triumphs yet a rule that still enflames tyranny and war and terrorism through today's multi trillion dollar resource trade Blood Oil shows how the West can now lead a peaceful revolution by ending its dependence on authoritarian oil and by getting consumers out of business with the men of blood The book describes practical strategies for upgrading world trade for choosing new rules that will make us more secure at home more trusted abroad and better able to solve pressing global problems like climate change Blood Oil shows citizens consumers and leaders how we can act together today to create a more united human future *Climate Change and Tourism in Southern Africa* Jarkko Saarinen, Jennifer Fitchett, Gijbert Hoogendoorn, 2022-03-30 This book explores the nature of climate change in southern Africa its impacts on tourism and the resilience adaptation and governance needs in various tourism operations and environments Previous studies on climate change and tourism have mainly focused on the Global North and specific forms of tourism such as snow based winter activities Drawing on case studies from a wide range of countries including South Africa Lesotho Namibia Botswana and Zimbabwe this book fills this lacuna by describing and analysing the climate change and tourism nexus in the southern African context The book begins by providing an overview of the current and estimated impacts of climate change to the tourism industry in the region highlighting the deepening socio economic inequities and environmental and social injustices It focuses on the importance of sustainable tourism in tackling these issues and highlights that resilience and robust governance and policy systems are essential for a tourism destination to successfully adapt to change By synthesising the key lessons learned through this analysis *Climate Change and Tourism in Southern Africa* also draws attention to specific adaptation and policy strategies which have value for other regions in the Global South This book will be of great interest to students and scholars of climate change tourism and environmental policy and justice **From #RhodesMustFall Movements to #HumansMustFall Movements** Artwell Nhemachena, Jairo Kangira, 2021-05-14 Might it be possible that the world is being migrated into an era where the imperial periphery will be increasingly governed through Artificial Intelligence AI and robotics designed to replace human beings Celebrated as efficient strong unflinching tireless precise and beyond corruption AI and robots are set to replace African leaders who are imperially deemed to be and consistently condemned as corrupt failed weak and inefficient But if these AI and robots are neo imperial tools and machinations the million dollar question is whether empire is not returning to recolonise the supposedly inefficient Africans via the new technologies and machinism Where Africans once celebrated their liberation war movements empire has enplaced what it calls liberation technologies designed to supposedly liberate African youths from their own states and governments led by liberation movements Where Africans once celebrated their liberation war movements empire has placed its own NGOs CSOs spewing liberal ideologies designed to ostensibly liberate African youths from their own supposedly

failed and corrupt states and government leaders With African youths citizens allying not with their liberation movements but with the liberation technologies and liberal NGOs CSOs it is not surprising why African citizens oppose their states led Fast Track Land Redistribution Programmes while ironically they happily celebrate Fast Tracked COVID 19 Vaccines Positing the notion of HumansMustFall movements this book underscores ways in which empire is in a process of eternal return to 21st century Africa The book is crucial for scholars and activists in political science government studies sociology anthropology cultural studies history languages and communication studies security studies military studies and development studies

Joshua Mqabuko Nkomo of Zimbabwe Sabelo J. Ndlovu-Gatsheni, 2017-08-17 This book is a pioneering study of Joshua Mqabuko Nkomo a Zimbabwean nationalist whose crucial role in the country's anti colonial struggle has largely gone unrecognized These essays trace his early influence on Zimbabwean nationalism in the late 1950s and his leadership in the armed liberation movement and postcolonial national building processes as well as his denigration by the winners of the 1980 elections Mugabe's Zimbabwe African National Union Patriotic Front The Nkomo that emerges is complex and contested the embodiment of Zimbabwe's tortured trajectory from colony to independent postcolonial state This is an essential corrective to the standard history of twentieth century Zimbabwe and an invaluable resource for scholars of African nationalist liberation movements and nation building

Hostile Money Paul Wilson, 2019-05-23 Money has the power to make nations and fuel wars It is both the subject of diplomacy and the tool of those seeking to overthrow hostile regimes at home and abroad

Germany's hyperinflation following the First World War has entered the public consciousness as an extreme example of what can happen to a currency in conflict. What is not widely known is that it is by no means the worst case of war-induced hyperinflation. Hostile Money looks at the impact of war and revolution on national currencies from Rome's civil war in the first century BC to the twenty-first century invasions of Afghanistan and Iraq by American-led forces and the economic sanctions and cyberwarfare of today.
