Outside the Anthropological Machine Chiara Mengozzi, 2020-05-14 In the midst of the climate crisis and the threat of the sixth extinction we can no longer claim to be the masters of nature Rather we need to unlearn our species arrogance for the sake of all animals human and non human Rethinking our being in the world as Homo sapiens this monograph argues starts precisely from the way we relate to our closer companion species The authors gathered here endeavour to find multiple exit strategies from the anthropocentric paradigms that have bound the human and social sciences Part I investigates the unexplored margins of human history by re reading historical events literary texts and scientific findings from an animal s perspective rather than a human s Part II explores different forms of human animal relationships putting the emphasis on the institutions spaces and discourses that frame our interactions with animals Part III engages with processes of translation that aim to render animals experience and perception into human words and visual language

Mahoney, Valerius Geist, 2019-09-10 The foremost experts on the North American Model of Wildlife Conservation come together to discuss its role in the rescue recovery and future of our wildlife resources At the end of the nineteenth century North America suffered a catastrophic loss of wildlife driven by unbridled resource extraction market hunting and unrelenting subsistence killing This crisis led powerful political forces in the United States and Canada to collaborate in the hopes of reversing the process not merely halting the extinctions but returning wildlife to abundance While there was great

understanding of how to manage wildlife in Europe where wildlife management was an old mature profession Continental methods depended on social values often unacceptable to North Americans Even Canada a loyal colony of England abandoned wildlife management as practiced in the mother country and joined forces with like minded Americans to develop a revolutionary system of wildlife conservation In time and surviving the close scrutiny and hard ongoing debate of open democratic societies this series of conservation practices became known as the North American Model of Wildlife Conservation In this book editors Shane P Mahoney and Valerius Geist both leading authorities on the North American Model bring together their expert colleagues to provide a comprehensive overview of the origins achievements and shortcomings of this highly successful conservation approach This volume reviews the emergence of conservation in late nineteenth early twentieth century North America provides detailed explorations of the Model s institutions principles laws and policies places the Model within ecological cultural and socioeconomic contexts describes the many economic social and cultural benefits of wildlife restoration and management addresses the Model s challenges and limitations while pointing to emerging opportunities for increasing inclusivity and optimizing implementation Studying the North American experience offers insight into how institutionalizing policies and laws while incentivizing citizen engagement can result in a resilient framework for conservation Written for wildlife professionals researchers and students this book explores the factors that helped fashion an enduring conservation system one that has not only rescued recovered and sustainably utilized wildlife for over a century but that has also advanced a significant economic driver and a greater scientific understanding of wildlife ecology Contributors Leonard A Brennan Rosie Cooney James L Cummins Kathryn Frens Valerius Geist James R Heffelfinger David G Hewitt Paul R Krausman Shane P Mahoney John F Organ James Peek William Porter John Sandlos James A Schaefer **SEAFDEC Annual Report** Southeast Asian Fisheries Development Center,2022 *Beavers* Frank Rosell,Róisín Campbell-Palmer,2022 Over the last 20 years there has been a huge increase in the number of scientific papers published on these remarkable creatures and an authoritative synthesis is now timely This accessible text goes beyond their natural history to describe the impacts on humans conflict mitigation animal husbandry management and conservation Political Ecology of REDD+ in Indonesia Jonas I.
