Time S Potential Power Thoughts 134:

Time in Contemporary Intellectual Thought P.J.N. Baert,1999-12-09 In this book fifteen authors from a wide spectrum of disciplines ranging from the natural sciences to the arts offer assessments of the way time enters their work the definition and uses of time that have proved most productive or problematic and the lessons their subjects can offer for our understanding of time beyond the classroom and laboratory walls The authors have tried without sacrificing analytical rigour to make their contribution accessible to a cross disciplinary readership Each chapter reviews time s past and present application in its respective field considers the practical and logical problems that remain and assesses the methods researchers are using to escape or resolve them Particular attention is paid to ways in which the technical treatment of time for problem solving and model building around specific phenomena call on or clash with our intuitive perceptions of what time is and does The spans of time considered range from the fractions of seconds it takes unstable particles to disintegrate to the millions of years required for one species to give way to another Like all central conceptual words time is understood on several levels By inviting input from a broad range of disciplines the book aims to provide a fuller understanding of those levels and of the common ground that lurks at their base Much agreement emerges not only on the nature of the problems time presents to modern intellectual thought but also on the clues that recent discoveries may offer towards possible solutions

R. Gershon Henoch Leiner's Thought in Its Contexts Jonathan Garb,2024-03-04 Does God Doubt shows that Rabbi Gershon Henoch Leiner of Radzin considered God to be revealed as doubt Thus according to this profound and important nineteenth century Hasidic leader doubt is an essential aspect of the human condition and especially of religious life His position is shown to be remarkably bold and unique compared to kabbalistic writing and especially to the Hasidic worlds to which he belonged At the same time the roots of his thought are located in earlier discussions of doubt as one of the highest parts of the divine world Doubt about in and of God is part of the Hasidic contribution to modernity **Between Auschwitz and Tradition** James R. Watson,2021-11-01 The reference of the postmodern task of thinking is Auschwitz the abyss and discontinuity separating us from the world of our ancestors As inhabitants of Planet Auschwitz our point of reference lacks all transcendental warrants it is not a non referable reference which constitutes the abyss we must enter endure and in which our intellectual and cultural tradition must be transformed The private public transformations which constitute the texts of this book attempt to depart from the dystopic individuality and public life resulting from business as usual after Auschwitz The three parts of the book are progressive reworkings of traditional metaphysics as adapted and modified by a modernism that refuses to grapple with its complicity It is precisely that complicity which postmodern thinking takes up in its attempt to signify otherwise than the easy modernist translations and images of tradition Thus it is a series of uneasy images imaging otherwise but never apart from modernity that take us away from complicity toward a transformed tradition The uneasy images of this book are photogrammic combinations of photographs and texts mutual supplements pulling tradition through the Event against the persistent and murderous forces of contemporary idolatry and repression Foreign Affairs Strategy Terry L. Tang,2010-03-15 This book advances a coherent statement of defensive realism as a theory of strategy for our time and adds to our understanding of defensive realism as a grand theory of IR in particular and our understanding of IR in general and contributes to the ongoing debates among major paradigms of international relations

Negativity and Democracy Vasilis Grollios,2017-01-12 The current political climate of uncompromising neoliberalism means that the need to study the logic of our culture that is the logic of the capitalist system is compelling Providing a rich philosophical analysis of democracy from a negative non identity dialectical perspective Vasilis Grollios encourages the

reader not to think of democracy as a call for a more effective domination of the people or as a demand for the replacement of the elite that currently holds power In doing so he aspires to fill in a gap in the literature by offering an out of the mainstream overview of the key concepts of totality negativity fetishization contradiction identity thinking dialectics and corporeal materialism as they have been employed by the major thinkers of the critical theory tradition Marx Engels Horkheimer Lukacs Adorno Marcuse Bloch and Holloway Their thinking had the following common keywords contradiction fetishism as a process and the notion of spell and all its implications The author makes an innovative attempt to bring these concepts to light in terms of their practical relevance for contemporary democratic theory **The Queer Child, or**
