Ravindra

Chary,2022-02-10 This book highlights the approaches for achieving trans disciplinary research integration for semi arid dryland agriculture systems under changing climates while also identifying the elements of a collaborative research agenda that are needed to advance global food security The book emphasizes climate change being a reality and how drylands are bearing the brunt in diverse ways The major impact of dryland agriculture is on communities that need to avoid the short and long term impacts of the changing climate adapt strategies that can minimize these impacts and be able to mitigate climate change for which they need climate smart interventions These interventions are only realized through knowledge and experience sharing among stakeholders from different sectors and backgrounds It is in this context that the publication was seen as a necessity in order to bring together ideas that will transform lives and build adaptation capacities thereby providing the much needed products in communities leading to development **Supply Chain Justice** Mary

Bosworth,2024-12-17 How the UK s immigration detention and deportation system turns people into monetized measurable units on a supply chain In the UK s fully outsourced immigration detainee escorting system private sector security employees detain circulate and deport foreign national citizens Run and organized like a supply chain this system dehumanises those who are detained and deported treating them as if they were packages to be moved from place to place and relying on poorly paid minimally trained staff to do so In Supply Chain Justice Mary Bosworth offers the first empirically grounded scholarly analysis of the British detention and deportation system Drawing on four years of extensive ethnographic research Bosworth examines what keeps the system in place and whether it might be effectively challenged Told by a senior manager that this is a logistics business Bosworth documents how the public and private sectors have built a supply chain in which people s humanity is transformed both symbolically and tangibly through administrative processes and bureaucracy into monetized measurable units Like all logistics the system has failure built into it The contract does not seek to eradicate risk but rather to manage it determining responsibility and apportioning a financial value to such failures as delay escape aborted flight or

death in custody Front line workers and managers depoliticise and normalise their efforts by casting their duties in familiar bureaucratic terms with targets service level agreements and key performance indicators Focusing on first hand accounts from workers and lengthy observation and document analysis Bosworth explores the impact of border logistics in order to ask what it would take to build inclusive infrastructures rather than those designed to exclude
