Robert C. Brears,2023-01-13 While urban settlements are the drivers of the global economy and centres of learning culture and innovation and nations rely on competitive dynamic regions for their economic social and environmental objectives urban centres and regions face a myriad of challenges that impact the ways in which people live and work create wealth and interact and connect with places Rapid urbanisation is resulting in urban sprawl rising emissions urban poverty and high unemployment rates housing affordability issues lack of urban investment low urban financial and governance capacities rising inequality and urban crimes environmental degradation increasing vulnerability to natural disasters and so forth At the regional level low employment low wage growth scarce financial resources climate change waste and pollution and rising urban peri urban competition etc are impacting the ability of regions to meet socio economic development goals while protecting biodiversity The response to these challenges has typically been the application of inadequate or piecemeal solutions often as a result of fragmented decision making and competing priorities with numerous economic environmental and social consequences In response there is a growing movement towards viewing cities and regions as complex and sociotechnical in nature with people and communities interacting with one another and with objects such as roads buildings

transport links etc within a range of urban and regional settings or contexts This comprehensive MRW will provide readers with expert interdisciplinary knowledge on how urban centres and regions in locations of varying climates lifestyles income levels and stages development are creating synergies and reducing trade offs in the development of resilient resource efficient environmentally friendly liveable socially equitable integrated and technology enabled centres and regions *The Zimbabwe Science News* ,1999 **Impact of Science on African Agriculture and Food Security P.**

Anandajayasekeram,2007 The need for agricultural research resources in the developing world cannot be underestimated but the availability of such resources is often poor due to lack of funding and investment In order for Africa and other such developing countries to achieve productivity in agriculture vital to food security poverty reduction and sustainable management of natural resources investment and policy development needs to be assessed This book a joint effort from IFPRI ILRI and the Kellogg Foundation explores the importance of impact assessment studies in Africa and assembles important evidence to pave the way for further much needed investment in agricultural research all over the developing world **Integrated River Basin Management through Decentralization** Karin Kemper,William Blomquist,Ariel

Dinar,2007-02-17 Drawing upon a worldwide survey of river basin organizations and in depth studies of eight river basins in a variety of locations around the globe this book examines how institutional arrangements for managing water resources at the river basin level have been designed and implemented what the impetus for these arrangements has been and what institutional features appear to be associated with greater or lesser success in river basin management The First 100 Days of Covid-19

Aleksandar Stojanović,Luisa Scarcella,Christina R. Mosalagae,2023-04-25 This book provides a novel in depth study of the early pandemic response policy at the intersection of political economy and law It explores 1 whether the responses to COVID 19 were democratically accountable 2 the ways in which new surveillance and enforcement techniques were adopted 3 the new monetary and fiscal policies which were implemented 4 the ways in which employed and unemployed persons were differently impacted by the new policies and 5 how companies were economically sustained through the pandemic A compelling look at what happens to societies when disaster strikes this book will be of interest to legal scholars political scientists and economists **Transforming the Rural Nonfarm Economy** Steven Haggblade,Peter

B. R. Hazell,Thomas Reardon,2007-11-16 Contrary to conventional wisdom that equates rural economies with agriculture rural residents in developing countries often rely heavily on activities other than farming for their income Indeed nonfarm work accounts for between one third and one half of rural incomes in the developing world In recent years accelerating globalization increasing competition from large businesses expanding urban markets for rural goods and services and greater availability of information and communication technology have combined to expose rural nonfarm businesses to new opportunities as well as new risks By examining these rapid changes in the rural nonfarm economy international experts explore how the rural nonfarm economy can contribute to overall economic growth in developing countries and how the poor

can participate in this rapidly evolving segment of the economy The authors review an array of recent studies of the rural nonfarm economy in order to summarize existing empirical evidence explore policy implications and identify future research priorities They examine the varied scale structure and composition of the rural nonfarm economy as well as its relationship with agricultural and urban enterprises And they address key questions about the role of public intervention in the rural nonfarm economy and how the rural poor can participate in and navigate the rapid transition underway in rural areas The contributors offer new insights to specialists in rural development and to others interested in overall economic development

Adapting to Climate Uncertainty in African Agriculture Stephen Whitfield, 2015-08-20 Future climatic and agro ecological changes in Africa are uncertain and associated with high degrees of spatial and temporal variability and this change is differently simulated within divergent climate crop models and in controlled crop breeding stations Furthermore uncertainty emerges in local contexts not just in response to climatic systems but to social economic and political systems and often with implications for the appropriateness and adoption of technologies or the success of alternative cropping systems This book examines the challenges of adaptation in smallholder farming in Africa analysing the social economic political and climatic uncertainties that impact on agriculture in the region and the range of solutions proposed Drawing on case studies of genetically modified crops conservation agriculture and other climate smart solutions in eastern and southern Africa the book identifies how uncertainties are framed from above as well experienced from below by farmers themselves It provides a compelling insight into why ideas about adaptation emerge from whom and with what implications This book offers a unique perspective and will be highly relevant to students of climate change adaptation food security and poverty alleviation as well as policy makers and field practitioners in international development and agronomy Handbook of Research on
