Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders. **Climate Change**

Mavhunga, 2023-11-21 A rallying manifesto for the innovative problem solving we need to build a better, more verdant and sustainable planetary existence. Academics are letting Africa down. With all that we know, what do we have to show for it? Whose lives have been changed for the better by it? What have we done for and with our communities lately? In this provocative book, the first in a trilogy, Clapperton Chakanetsa Mavhunga argues that our critical thinkers must become actual thinkers. Taking its title from one of Thomas Sankara's most inspirational speeches, *Dare to Invent the Future* looks for moments in Africa's story where precedents of critical thought and knowledge in service of problem solving are evident to inspire readers to dare to invent such a knowledge system. Mavhunga revisits insights from Edward Wilmot Blyden, Booker T. Washington, Aimé Césaire, Frantz Fanon, Amílcar Cabral, Julius Nyerere and Thomas Sankara to illustrate how the academic disciplines have been and could be deployed in the service of and through problem solving, building on what people are doing and know. At its core, he writes, knowledge in the service of and through problem solving derives from reading the past for new questions, doing due diligence in the present and contriving an anticipatory approach toward the future. Questioning the fundamental premises of Western and white knowledge production, especially regarding science and technology, Mavhunga proposes in this book refreshingly new approaches to thinking, doing that stem from African realities in the hopes of inspiring a generation that will run toward, not away from, problems to solve them. Water is Life Hellum, Anne, Kamari-Mbote, Patricia, 2015-10-19 This book approached water and sanitation as an African gender and human rights issue. Empirical case studies from Kenya, Malawi, South Africa and Zimbabwe show how coexisting international, national and local regulations of

water and sanitation respond to the ways in which different groups of rural and urban women gain access to water for personal domestic and livelihood purposes The authors who are lawyers sociologists political scientists and anthropologists explore how women cope in contexts where they lack secure rights and participation in water governance institutions formal and informal The research shows how women as producers of family food rely on water from multiple sources that are governed by community based norms and institutions which recognise the right to water for livelihood How these common pool water resources due to protection gaps in both international and national law are threatened by large scale development and commercialisation initiatives facilitated through national permit systems is a key concern The studies demonstrate that existing water governance structures lack mechanisms which make them accountable to poor and vulnerable water users on the ground most importantly women The findings thus underscore the need to intensify measures to hold states accountable not just in water services provision but in assuring the basic human right to clean drinking water and sanitation and also to protect water for livelihoods

Water Politics David L. Feldman,2017-02-27 As the world faces another water crisis it is easy to understand why this precious and highly disputed resource could determine the fate of entire nations In reality however water conflicts rarely result in violence and more often lead to collaborative governance however precarious In this comprehensive and accessible text David Feldman introduces readers to the key issues debates and challenges in water

politics today Its ten chapters explore the processes that determine how this unique resource captures our attention the sources of power that determine how we allocate use and protect it and the purposes that direct decisions over its cost availability and access Drawing on contemporary water controversies from every continent from Flint Michigan to Mumbai Sao Paulo and Beijing the book argues that cooperation and more equitable water management are imperative if the global community is to adequately address water challenges and their associated risks particularly in the developing world While alternatives for enhancing water supply including waste water re use desalination and conservation abound without inclusive means of addressing citizens concerns their adoption faces severe hurdles that can impede cooperation and generate additional conflicts

*Climate Change and Food Security* Elizabeth Thomas Hope, 2016-12-08 Global climatic change has resulted in new and unpredictable patterns of precipitation and temperature the increased frequency of extreme weather events and rising sea levels These changes impact all four aspects of food security availability accessibility stability of supply and appropriate nourishment as well as the entire food system food production marketing processing distribution and prices Climate Change and Food Security focuses on the challenge to food security posed by a changing climate The book brings together many of the critical global concerns of climate change and food security through local cases based on empirical studies undertaken in Sub Saharan Africa and the Caribbean Focusing on risk reduction and the complex nature of vulnerability to climate change the book includes chapters on the responsiveness of farmers based on traditional knowledge as well as the critical phenomenon of food insecurity in the urban setting Other chapters are devoted to efforts made to strengthen resilience through long term development with interventions at the regional and national levels of scale It also examines cross cutting themes that underlie the strategies employed to achieve food security including equity gender livelihoods and governance This edited volume will be of great interest to students and scholars of climate change food security environmental management and sustainable development

*Indigenous knowledge systems and climate change management in Africa* Ajayi, O.C. (ed), Mafongoya, P.L. (ed), 2017-11-15 Climate change presents a profound challenge to food security and sustainable development in Africa Its negative impacts are likely to be greatest in the African region which is already food insecure In the face of global climate change and its emerging challenges and unknowns it is essential that decision makers base policies on the best available knowledge In recent years the knowledge of local and indigenous people often referred to as indigenous knowledge IK has been increasingly recognised as an important source of climate knowledge and adaptation strategies

*African Edible Insects As Alternative Source of Food, Oil, Protein and Bioactive Components* Abdalbasit Adam Mariod, 2020-01-10 The harvesting processing and consumption of edible insects is one of the main keys to the sustainability of food chains on the African continent Insects are the largest and most successful group of animals on the planet and it is estimated that they comprise 80% of all animals This makes edible insects extremely important to the future survival of large populations across Africa and the world Insects offer a complete animal protein that includes all 9 essential

amino acids and are very competitive with other protein sources They are also a good source of beneficial unsaturated fats and many insects have a perfect Omega 3 6 balance African Edible Insects As Alternative Source of Food Oil Protein and Bioactive Components comprehensively outlines the importance of edible insects as food and animal feed and the processing of insects in Africa The text also highlights indigenous knowledge of edible insects and shows the composition and nutritional value of these insects plus presents reviews of current research and developments in this rapidly expanding field All of the main types of edible insects are covered including their nutritional value chemical makeup and harvesting and processing details The various preparation technologies are covered for each insect as are their individual sensory qualities and safety aspects A key aspect of this work is its focus on the role of insects in edible oils and gelatins Individual chapters focus on entomophagy in Africa and the various key aspects of the continent's growing edible insect consumption market As it becomes increasingly clear that the consumption of insects will play a major role in the sustainability of food chains in Africa this work can be used as a comprehensive and up to date singular source for researchers looking for a complete overview on this crucial topic
