Development Goals SDGs in 2015 ushered a new era in the global development agenda as the world transitioned from the Millennium Development Goals MDGs. The new era of SDGs that are all inclusive unlike the MDGs with the focus now being on ensuring human success that is predicated on environmental protection. The year 2020 marked five years post the adoption of the SDGs with increased calls for stock taking of progress made amid strong calls for a decade of action to accelerate the delivery of the SDGs by 2030. These calls have been louder now given the impact of the COVID 19 pandemic which reset the global economy and increased intensity of extreme weather events across the world. Since climate change has emerged as one of the biggest threats to the achievement of the SDGs there has been growing concerns on its impact on biodiversity loss and the extinction of some species. There are also concerns regarding increased food insecurity at the household level in some parts of the world particularly in Asia and Africa. With the demand for climate change action on the increase there have also been growing calls for the big carbon emitters to drastically cut their emissions and invest in clean energy to save the planet by following development pathways making emissions stay under the 1.5°C increase in temperature.

Over the last few decades many countries have reformed their secured transactions law. One of the main reasons has been the clear link between reform and the availability of credit and the drive to improve access to finance particularly for micro, small and medium sized enterprises. This book focuses particularly on developing economies in Africa which have legal frameworks influenced by English, French, Belgian, Roman Dutch and other laws. Reform in this area of law across African countries has taken a number of forms which are explored and discussed in this book. **Secured Transactions Law Reform in Africa** is a mixture of a critical description of the pre-reform law and practice and the reform process itself. It also includes a comparative analysis of the legal provisions and an examination of the early results of the reforms. The book sets out a road map for the future of secured transactions reform primarily in Africa but also in other countries that have undertaken or are contemplating similar reforms. This book is the second in a series of books about Secured Transactions Law in countries around the world and its reform both on a national and an international scale. The first book **Secured Transactions Law Reform: Principles, Policies and Practice** was published in 2016. **Gender Parity and Multicultural Feminism** Ruth Rubio-Marín, Will Kymlicka, 2018-09-25. Around the world we see a participatory turn in the pursuit of gender equality exemplified by the adoption of gender quotas in national legislatures to promote women's role as decision makers. We also see a pluralism turn with increasing legal recognition given to the customary law or religious law of minority groups and indigenous peoples. To date the former trend has primarily benefitted majority women and the latter has

primarily benefitted minority men Neither has effectively ensured the participation of minority women In response multicultural feminists have proposed institutional innovations to strengthen the voice of minority women both at the state level and in decisions about the interpretation and evolution of cultural and religious practices This volume explores the connection between gender parity and multicultural feminism both at the level of theory and in practice The authors explore a range of cases from Europe Latin America the Middle East and Africa in relation to state law customary law religious law and indigenous law While many obstacles remain and many women continue to suffer from the paradox of multicultural vulnerability these innovations in theory and practice offer new prospects for reconciling gender equality and pluralism
