Tackling Trauma Paul A. Barker, 2019-03-14. Trauma is a universal phenomenon that can be caused by international catastrophes or individual personal tragedy. Trauma is also a severely neglected topic in Christian literature and while it can challenge someone's faith in Christ, God and the ministry of his Word is central to dealing with the emotional and psychological impact of trauma. By his Spirit, through his Word and through his church, God is available to minister to people suffering from trauma and bring transformation to their lives. In this book, a team of experienced and informed Christian professionals from around the world promote a deep biblical response to trauma through clinical and theological wisdom and their first-hand experience of witnessing and experiencing trauma. The contributions provide practical responses to people's trauma rather than mere descriptions of the problems, making it an ideal resource for pastors, counsellors, humanitarian workers and students.

Bridging the Academia Industry Divide Wilson R. Nyemba, Charles Mbohwa, Keith F. Carter, 2021-05-12. This book is the result of years of research following a realization of the mismatch of engineering skills produced by universities and those that industry required based on the situation in Sub-Saharan Africa, equally applicable to other regions in Africa and indeed worldwide. The book is meant to assist engineering academics and engineers in industry to build capacity and cope with the dynamic trends in technology brought on by the 4th Industrial Revolution and to prepare for the 5th Industrial Revolution, an era predicted to be dominated by critical and system thinkers with creative and innovative skills as basic necessities. The book is also useful for policy-making researchers in academia, industrial and public sector researchers and implementers in governments that provide required funding for the development of human resources and skills. The book primarily consists of the novel research and innovation approaches of modelling and building systems thinking sub-models which were ultimately integrated into the Universal Systems Thinking (UST) model aimed at improving the quality of engineers and engineering practice. The initiatives in this book include strategies for bridging the gap between industry and academia through systems thinking research. The book provides information on how to model, simulate, adjust and implement integrated systems thinking approaches to engineering education and training for capacity building and sustainability. The book also covers approaches to address research gaps and

mismatch of skills while capitalizing on the successes of several projects carried out and supported by the Royal Academy of Engineering over the years *Making Politics in Zimbabwe's Second Republic* Gordon Moyo, Kirk Helliker, 2023-05-16 The book provides a fresh and innovative interpretation of the new government of Zimbabwe led by Emmerson Mnangagwa which emerged in late 2017 after the downfall of Robert Mugabe It demonstrates the contradictory character of the Mnangagwa government involving both continuities and discontinuities in relation to Mugabe's regime The temptation amongst Zimbabwean scholars has been to focus on the continuities and to dismiss the significance of any discontinuities notably reform measures This book adopts an alternative approach by identifying and focusing specifically on the existence of a formative project of the Mnangagwa's Second Republic further analysing its political significance as well as risks and limitations While doing so the book covers topics such as reform measures reconciliation transitional justice corruption the media agriculture devolution and the debt crisis as well as health and education Discussing the limitations of these different reform measures the book highlights that any scholarly failure to identify the risks of the project leads to an incomplete understanding of what constitutes the Mnangagwa's Second Republic The book appeals to students scholars and researchers of Zimbabwean and African studies political science and international relations as well as policymakers interested in a better understanding of political reform processes **Sustainable Finance and Business in Sub-Saharan Africa** David
