system      *Environmental Resilience* Percy Toriro, Innocent Chirisa, 2021-05-21 This book discusses the production distribution regulatory and management frameworks that affect food in urban settings It plugs a gap in knowledge especially in the sub Saharan Africa region where food despite its critical importance has been ignored as a determinant of success in the planning and management of cities and towns The various chapters in the book demonstrate how urban populations in Zimbabwe and elsewhere have often devised ways to produce own food to supplement on their incomes Food is produced largely by way of urban agriculture or imported from the countryside and sold in both formal and informal stores and stalls The book shows how in spite of the important space food occupies in the lives of all city residents the planning and regulatory framework does not facilitate the better performance of food systems      **Culture, Schooling, and Children's Learning**
