Just Another Car Factory? James Rinehart, Christopher Huxley, David Robertson, 2018-09-05 This study of CAMI Automotive a unionized joint venture between General Motors and Suzuki is the most comprehensive ever undertaken of a lean production plant James Rinehart Christopher Huxley and David Robertson address a topic that has inspired fierce debate in industrial relations sociology labor studies and human resource management Heralded as a model of lean production when it opened in 1989 CAMI promised workers something different from traditional plants a humane environment empowerment and cooperative labor management relations However the enthusiasm workers felt during the orientation and early phases of production steadily declined as did their involvement in participatory activities Workers came to describe CAMI as just another car factory Union challenges and shopfloor resistance to key elements of the lean system grew capped by a five week strike in 1992 The authors attribute workers disillusionment to lean production itself rather than to North American managers inadequate implementation Toyota Corolla Owners Workshop Manual John Harold Haynes, B.
