Concepts of Earth Science & Chemistry Parent Lesson Plan John Hudson Tiner, 2013-08-26

Concepts of Earth and Chemistry Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student. Materials for each semester are independent of one another to allow flexibility.

Semester 1: Earth Blending a creationism perspective of history with definitions of terms and identification of famous explorers/scientists etc. This book gives students an excellent initial knowledge of people and places, encouraging them to continue their studies in depth.

Semester 2: Chemistry Chemistry is an amazing branch of science that affects us every day yet few people realize it or even give it much thought. Without chemistry, there would be nothing made of plastic, there would be no rubber tires, no tin cans, no televisions, no microwave ovens or something as simple as wax paper. This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries of discoverers. Find out why pure gold is not used for jewelry or coins. Join Humphry Davy as he made many chemical discoveries and learn how they shortened his life. See how people in the 1870s could jump over the top of the Washington Monument. *Exploring the World of Chemistry* brings science to life and is a wonderful learning tool with many illustrations and biographical information.
