Understanding Heritage And Memory Understanding:

Understanding Heritage and Memory Tim Benton, 2010-03-15 Written by an interdisciplinary team of scholars this authoritative text explores the emotive issues surrounding the commemoration of war and atrocity and the profound challenges for conservators posed by virtual intangible and multicultural heritage New international case studies demonstrate that while interest in the memorialization of the great national upheavals of the last century has never been more acute many of the problems of conserving the past in diverse and disparate societies remain to be resolved Aimed primarily at students in heritage studies and professionals in heritage industries this is book one of three in the Understanding Global Heritage series

Understanding Heritage Marie-Theres Albert, Roland Bernecker, Britta Rudolff, 2013-04-30 The publication is the first in a new series on existing and innovative paradigms in Heritage Studies The series aims at systematising and developing the academic discourse on heritage which has yielded a wealth and breadth of contributions over the past few years The publication offers its own emphasis by developing heritage studies with a perspective towards and as a contribution to human development It thus offers a vision for the construction and establishment of a new discipline The academic mainsprings and research interests of this repositioning of heritage studies as an academic discipline are discussed by internationally renowned thinkers and heritage practitioners The publication thus establishes first important points for discussion Central to this publication are questions concerning the sustainable protection and use of heritage focussing on the world cultural heritage and intangible cultural heritage but equally questions on the relation of heritage and memory and how these could mutually enrich our understanding of heritage

Remembering the First World War Bart Ziino, 2014-12-05 Remembering the First World War brings together a group of international scholars to understand how and why the past quarter of a century has witnessed such an extraordinary increase in global popular and academic interest in the First World War both as an event and in the ways it is remembered The book discusses this phenomenon across three key areas The first section looks at family history genealogy and the First World War seeking to understand the power of family history in shaping and reshaping remembrance of the War at the smallest levels as well as popular media and the continuing role of the state and its agencies The second part discusses practices of remembering and the more public forms of representation and negotiation through film literature museums monuments and heritage sites focusing on agency in representing and remembering war The third section covers the return of the War and the increasing determination among individuals to acknowledge and participate in public rituals of remembrance with their own contemporary politics What for instance does it mean to wear a poppy on armistice remembrance day How do symbols like this operate today These chapters will investigate these aspects through a series of case studies Placing remembrance of the First World War in its longer historical and broader transnational context and including illustrations and an afterword by Professor David Reynolds this is the ideal book for all those interested in the

history of the Great War and its aftermath *Dimensions of Heritage and Memory* Christopher Whitehead, Susannah Eckersley, Mads Daugbjerg, Gönül Bozoğlu, 2019-07-23 *Dimensions of Heritage and Memory* is a landmark contribution on the politics of the past in Europe today. The book explores the meanings of heritage in a time of crisis when the past permeates social and political divisions, identity contests and official projects to forge a European community. Providing an overview of the literature and an analysis of the assumptions, values and philosophies embedded within European level policy, the book explores different dimensions of heritage and memory from official sites, museums and policy to party politics, historical re-enactments and the everyday ways in which people use the past to make sense of who they are. The volume explores how different understandings of and attachments to the European past produce different Europes in the present, accounting for today's tense social and political relations. The book also explores formative histories for European identities that are neglected or hidden because of political circumstances and non-official heritage. Contributors consider the meanings of interlocking crises such as economic fallout, xenophobia and the fragmentation of the EU for new understandings of Europe's past in the present. *Dimensions of Heritage and Memory* will be of great interest to researchers, academics and postgraduate students in the fields of heritage and memory studies, museum studies, history, cultural studies, sociology, anthropology and politics. The book will also be interesting to practitioners and cultural heritage policy makers. Chapters 1, 3, 4, 9 and 10 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non-Commercial No Derivatives CC BY-NC-ND 4.0 license.

Heritage Rodney Harrison, 2013. Historic sites, memorials, national parks, museums: we live in an age in which heritage is ever present. But what does it mean to live amongst the spectral traces of the past, the heterogeneous piling up of historic materials in the present? How did heritage grow from the concern of a handful of enthusiasts and specialists in one part of the world to something which is considered to be universally cherished? And what concepts and approaches are necessary to understanding this global obsession? Over the decades since the adoption of the World Heritage Convention, various definitions of definition have significantly influenced the ways in which heritage is classified, perceived and managed in contemporary global societies. Taking an interdisciplinary approach to the many tangible and intangible things now defined as heritage, this book attempts simultaneously to account for this global phenomenon and the industry which has grown up around it, as well as to develop a toolkit of concepts with which it might be studied. In doing so, it provides a critical account of the emergence of heritage studies as an interdisciplinary field of academic study. This is presented as part of a broader examination of the function of heritage in late modern societies, with a particular focus on the changes which have resulted from the globalisation of heritage during the late twentieth and early twenty-first centuries. Developing new theoretical approaches and innovative models for more dialogically democratic heritage decision-making processes, *Heritage: Critical Approaches* unravels the relationship between heritage and the experience of late modernity whilst reorienting heritage so that it might be more productively connected.

with other pressing social economic political and environmental issues of our time **Return to Alexandria** Beverley Butler, 2016-07-01 The Bibliotheca Alexandrina was launched with great fanfare in the 1990s a project of UNESCO and the Egyptian government to recreate the glory of the Alexandria Library and Museion of the ancient world The project and its timing were curious it coincided with scholarship moving away from the dominance of the western tradition it privileged Alexandria's Greek heritage over 1500 years of Islamic scholarship and it established an island for the cultural elite in an urban slum Beverley Butler's ethnography of the project explores these contradictions and the challenges faced by Egyptian and international scholars in overcoming them Her critique of the underlying foundational concepts and values behind the Library is of equal importance a nuanced postcolonial examination of memory cultural revival and homecoming In this she draws upon a wide array of thinkers Freud Derrida Said and Bernal among others Butler's book will be of great value to museologists historians archaeologists cultural scholars and heritage professionals *Heritage and Tourism* Russell Staiff, Robyn Bushell, Steve Watson, 2013-06-26 The complex relationship between heritage places and people in the broadest sense can be considered dialogic a communicative act that has implications for both sides of the conversation This is the starting point for *Heritage and Tourism* However the dialogue between visitors and heritage sites is complex Visitors have for many decades become synonymous with tourists and the tourism industry and so the dialogic relationship between heritage place and tourists has produced a powerful critique of this often contested relationship Further at the heart of the dialogic relationship between heritage places and people is the individual experience of heritage where generalities give way to particularities of geography place and culture where anxieties about the past and the future mark heritage places as sites of contestation sites of silences sites rendered political and ideological sites powerfully intertwined with representation sites of the imaginary and the imagined Under the aegis of the term dialogues the heritage tourism interaction is reconsidered in ways that encourage reflection about the various communicative acts between heritage places and their visitors and the ways these are currently theorized so as to either step beyond where possible the ontological distinctions between heritage places and tourists or to re-imagine the dialogue or both *Heritage and Tourism* is thus an important contribution to understanding the complex relationship between heritage and tourism **Geographies of Post-Industrial Place, Memory, and Heritage** Mark Alan Rhodes II, William R. Price, Amy Walker, 2020-11-23 All industrialization is deeply rooted within the specific geographies in which it took place and echoes of previous industrialization continue to reverberate in these places through to the modern day This book investigates the overlap of memory and the impacts of industrialization within today's communities and the senses of place and heritage that grew alongside and in reaction to the growth of mines mills and factories The economic and social change that accompanied the unchecked accumulation of wealth and exploitation of labor as the industrial revolution spread throughout the world has numerous lasting impacts on the socioeconomics of today Likewise the planet itself is now reeling The memory and heritage of these processes reach into the communities that owe

the industrial revolution their existence but these populations also often suffered adverse impacts to their health and environment through the large scale and rapid extraction of natural resources and production of goods Through the themes of memory community and place working post industrial landscapes and the de romanticization of industrial pasts this book examines the endurance and decline of these communities the spatial processes of industrial byproducts and the memory and heritage of industrialization and its legacies While based in the traditions of geography this collection also draws upon and will be of great interest to students and scholars of cultural anthropology archaeology sociology history architecture civil engineering and heritage memory museum and tourism studies Using global examples the authors provide a uniquely geographic understanding to industrial heritage across the spaces places and memories of industrial development *Public Memory, Race, and Heritage Tourism of Early America* Cathy Rex,Shevaun E. Watson,2021-10-20 This book addresses the interconnected issues of public memory race and heritage tourism exploring the ways in which historical tourism shapes collective understandings of America s earliest engagements with race It includes contributions from a diverse group of humanities scholars including early Americanists and scholars from communication English museum studies historic preservation art and architecture Native American studies and history Through eight chapters the collection offers varied perspectives and original analyses of memory making and re making through travel to early American sites bringing needed attention to the considerable role that tourism plays in producing and possibly unsettling racialized memories about America s past The book is an interdisciplinary effort that analyses lesser known sites of historical and racial significance throughout North America and the Caribbean up to about 1830 to unpack the relationship between leisure travel processes of collective remembering or forgetting and the connections of tourist sites to colonialism slavery genocide and oppression *Public Memory Race and Heritage Tourism of Early America* provides a deconstruction of the touristic experience with racism slavery and the Indigenous experience in America that will appeal to students and academics in the social sciences and humanities The introductory chapter and chapter 3 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Heritage as an action word: Uses beyond communal memory Susan Shay,Kelly M. Britt,2024-04-16 There is no limit to what constitutes heritage By definition heritage is the use of the past for present purposes Yet to any given group or population heritage can be a multitude of things and can serve a variety of purposes Based on shared memory heritage can be tangible or intangible boundless in variety and scope it can be for example objects landscapes food or clothing music or dance sites or statues monuments or buildings Importantly however heritage also has many and varied uses and powers It can be used to control to unite to engage and to empower people communities and nations In this interdisciplinary volume authors from around the world explore how different communities nations and groups intentionally and creatively use heritage both tangible and intangible in a wide variety of ways to positively address social and environmental issues

Significantly these studies demonstrate how heritage can be an exceptionally valuable tool for political economic and social change. Insightful studies are presented pertaining to heritage as social memory including the nationalistic political use of heritage, heritage as resistance to political powers, traditional knowledge as environmental science, heritage for legal and community action, heritage for building peace, heritage for Indigenous and minority empowerment, and heritage for exploring the past through phenomenological methods. The goal of this volume is to move beyond seeing heritage as only social memory, a mere interpretation of static past events, people or places, and instead explores critically the variety of ways heritage is engaged in the present and can be in the future.

The Rise of Heritage Astrid Swenson, 2013-12-19 A richly illustrated book exploring the origins of the modern fascination for heritage, comparing preservation in France, Germany, and England.

Authentic and Inauthentic Places in Tourism Jane Lovell, Chris Bull, 2017-09-05 With the rise of post truth and fake news, a thorough examination of authenticity has never been so relevant. This book explores the geography of authenticity, investigating a wide variety of places used by tourists. Not only does it assess what might be described as the more traditional objects for examination, places such as the city, the countryside, and the coast, it also includes chapters on art and place, hipster places, gentrification, heritage sites, film locations, photographed places, and eventful places. Using a wide angled lens on places reveals linkages and possibilities, enabling the book to skate across the surface of the geography of authenticity, locating the magically real, heritage site, the poignant replica, the authenticated theme park, the unmasked carnival. In focusing on authentic and inauthentic places, this text provides a useful contribution to the understanding of how places are changing, how they are perceived, and how authenticity is embodied and performed within them. *Authentic and Inauthentic Places in Tourism* is an insightful study and an essential read for those involved in the study of geography, tourism, urban studies, culture, and heritage.

Critical Perspectives on Cultural Memory and Heritage Veysel Apaydin, 2020-02-18 *Critical Perspectives on Cultural Memory and Heritage* focuses on the importance of memory and heritage for individual and group identity and for their sense of belonging. It aims to expose the motives and discourses related to the destruction of memory and heritage during times of war, terror, sectarian conflict, and through capitalist policies. It is within these affected spheres of cultural heritage where groups and communities ascribe values, develop memories, and shape their collective identity.

Memory, Heritage, and Preservation in 20th-Century England David Strittmatter, 2023-03-09 This book explores commemoration practices and preservation efforts in modern Britain, focusing on the years from the end of the First World War until the mid 1960s. The changes wrought by war led Britain to reconsider major historical episodes that made up its national narrative. Part of this process was a reassessment of heritage sites because such places carry socio-political meaning, as do the memorials that mark them. This book engages the four-way intersection of commemoration, preservation, tourism, and urban planning at some of the most notable historic locations in England. The various actors in this process, from the national government and regional councils to private organizations and interested individuals, did nothing less than engineer

British national memory The author presents case studies of six famous British places namely battlefields Hastings and Bosworth political sites Runnymede and Peterloo and world s fairgrounds the Crystal Palace and Great White City In all three genres of heritage sites one location developed through commemorations and tourism while the other anti sites simultaneously faltered as they were neither memorialized nor visited by the masses Ultimately the book concludes that the modern social and political environment resulted in the revival creation or erasure of heritage sites in the service of promoting British national identity A valuable read for British historians as well as scholars of memory public history and cultural studies the book argues that heritage emerged as a discursive arena in which British identity was renegotiated through times of transitions both into a democratic age and an era of geopolitical decline The Politics of World Heritage
