Unit 4: Analyzing Across Genres

Anchor Text(s)

Animal Farm by George Orwell

Pacing

7 Weeks

Unit Overview

In this unit, students will read George Orwell's *Animal Farm* with the goal of understanding its role as an allegory of the Russian Revolution and the Communist Soviet Union. In order to truly access this text, students must understand that in an allegory, everything has symbolic meaning. Students will examine nonfiction texts about the time period in order to better interpret Orwell's novel and analyze its impact. Within *Animal Farm*, they will analyze character motivations and how different events propel the plot. Students will make inferences about different points of view and analyze the effect this has on the reader. Ultimately, students should walk away able to articulate George Orwell's central themes and explain how his craft and choices intentionally conveyed them.

Another major goal for this unit is for students to engage meaningfully with a variety of texts across genres in order to understand *Animal Farm* on a deeper level. For this reason, making comparisons and connections across texts and genres is a central skill. Students will also learn the importance of examining what they are told, and they will investigate the danger of believing propaganda without examining its source.

By the end of the unit, students should be able to explain the following:

- I. *Animal Farm* is an allegory, serving directly as a critique of Communism and Stalin's leadership and more generally as a critique of totalitarianism
- II. Authors can use literature as a form of political commentary. Orwell wrote *Animal Farm* as an allegory largely so that its complex ideas and criticisms would be accessible (and interesting) to a wider audience.
- III. People use rhetoric and propaganda to gain and maintain power. For this reason, we must be careful and thoughtful consumers of information.
- IV. With freedom and power comes great responsibility, and it is dangerous when people with malicious or corrupt intentions get into positions of absolute power.

Because *Animal Farm* is an allegory (likely a new concept for students), it will be important to emphasize the necessity of re-reading and annotating in order to better understand both layers of this story. In this genre, rereading is for more than basic comprehension. Rereading and collecting information from a variety of sources will enable students to analyze the symbolism, author's purpose, and themes.

The unit concludes with a weeklong exploration of literary elements and themes that span across two texts: *Animal Farm* and the short story, "Harrison Bergeron" by Kurt Vonnegut. Students will demonstrate mastery of skills and understanding of key themes and ideas by participating in a seminar discussion and by writing an argumentative essay, or "position paper."

Bruce Tomblin, Marilyn A. Nippold, 2014-03-26 This volume presents the findings of a large scale study of individual differences in spoken and heard language development during the school years The goal of the study was to investigate the degree to which language abilities at school entry were

stable over time and influential in the child's overall success in important aspects of development. The methodology was a longitudinal study of over 600 children in the US Midwest during a 10-year period. The language skills of these children along with reading academic and psychosocial outcomes were measured. There was intentional oversampling of children with poor language ability without being associated with other developmental or sensory disorders. Furthermore, these children could be subgrouped based on their nonverbal abilities such that one group represents children with specific language impairment (SLI) and the other group with nonspecific language impairment (NLI) represents poor language along with depressed nonverbal abilities. Throughout the book, the authors consider whether these distinctions are supported by evidence obtained in this study and which aspects of development are impacted by poor language ability. Data are provided that allow conclusions to be made regarding the level of risk associated with different degrees of poor language and whether this risk should be viewed as lying on a continuum. The volume will appeal to researchers and professionals with an interest in children's language development, particularly those working with children who have a range of language impairments. This includes Speech and Language Pathologists, Child Neuropsychologists, Clinical Psychologists working in Education, as well as Psycholinguists and Developmental Psychologists. **Middle School Journal**, 2003 **Resources in Education**, 2001-10

Assessment for Learning Within and Beyond the Classroom Siew Fun Tang, Loshinikarasi Logonnathan, 2016-06-29. These conference proceedings focus on Assessment for Learning Within and Beyond the Classroom in recognition of the power of assessment for learning as a way of boosting student performance. They explore the breadth, depth, and quality of the best models and practices, strategies learned, and discuss cases of successful implementation of assessment within the classroom and beyond, including the virtual space. They also provide fertile ground for stimulating and comparing responsive assessment approaches and practices in relatively new areas of assessment such as graduate capability assessment in view of the need for educational institutions to evidence graduate employability. **Lesson Design for Differentiated**

Assessment in Geographical Education: An International Perspective Theresa Bourke,Reece Mills,Rod Lane,2022-02-27

In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills
