Strategy-Driven Leadership Michael A.

Couch, Richard S. Citrin, 2019-10-14 It is estimated that U.S. companies spend over 14 billion annually on leadership development. Match that number to the abundant and growing research that finds most leadership development to be ineffective and the conclusion is a phenomenal amount of waste. The remedy for this situation is to have business strategy drive leadership development instead of creating programs that match a one size fits all approach to leadership. This book's approach called Strategy Driven Leadership Development (SDLD) puts business strategy first. It maintains an emphasis on building leadership programs around what it will take to make the business successful as opposed to implementing a program in the hopes that it will benefit the strategy. The result is a differentiated and targeted approach called Intentional Leadership Development which provides the structure for transforming how leadership development is undertaken. At the heart of this book however is the explanation of how small incremental changes in action and perspective create meaningful changes in the way leadership is developed. The focus is on the leadership behaviors associated with success for any company. Some companies may need leaders with better financial acumen while others may require better teamwork for success. These skills are learnable and when the energy of an organization is behind it then leadership development can be transformational. The authors' method retools prior leadership efforts; the emphasis is not on previous failures and restarting with new programs. There are many effective ideas and actions that are currently embedded in leadership programs but they miss the critical element of tying their efforts to the business strategy. Strategy Driven Leadership changes the way organizations think about and drive their leadership talent initiatives among their current and upcoming leaders. The book is filled with research, science based information, case studies, and practical hands on tools on why and how this Strategy Driven Leadership Development model will transform company leadership approaches. Teaching Leadership Gama Perruci, Sadhana Warty Hall, 2018-07-27 We can teach leadership. The authors share their personal experiences of how they have bridged theory and practice in curricular and co-curricular settings to set the pace and tone for leadership development and life long learning. Starting from theories of leadership they share how it can be taught with rigor, intentionality, structure and organization. Assessment is key from conception to implementation. Scholars, educators and practitioners from different fields and professions are invited to adjust, adopt and adapt concepts, ideas, methods and processes discussed in this book to their own institutional contexts and reality. Smart Work (2nd Edition) Lucy D. Freedman, 2012-11 Freedman demonstrates to today's corporate managers and high tech professionals that the seemingly chaotic world of corporate communication actually has a structure and that the structure or syntax can be decoded and used to one's advantage. **School Counselors as Practitioners** Judy A.
