

THREADING THE MACHINE

Your sewing machine is easily threaded. Tension discs, thread guides and take-up lever have been designed as internal parts, eliminating many extra threading steps. The clear threading path helps you avoid threading errors.

To thread your machine correctly, simply follow the steps below:

- Raise presser foot lifter.
- Raise needle to its highest position by turning hand wheel toward you.
- Place spool of thread on spool pin (1).
- Slide spool cap (2) firmly over the rim of the spool to prevent thread tangling.
- Snap thread into thread guide post (3).
- Following arrows, guide thread into auto tension channel (4) down to needle and firmly pull thread.
- Thread needle from front to back.

USING THE NEEDLE THREADER (P)

To help in threading the machine needle, use the needle threader as follows:

- Thread machine and draw 4" (10 cm) of thread down to the needle.
- Lower presser foot lifter.
- Holding needle threader as shown with your right hand, position U-shaped part of threader under bar of needle clamp.
- Snap threader up onto bar.

- Swing threader back just far enough to clear the needle.
- Slide threader as far to the left as it will go.
- Be sure guide (1) is against the left side of the needle.

- Bring metal hook of threader forward, through the eye of the needle.
- Holding 3" (7.5 cm) of thread between your fingers, guide thread into metal hook. Release thread.

- Holding threader with right hand, draw metal hook and thread backwards through eye of the needle.
- To remove needle threader, slide it to the right, and off bar of needle clamp.
- Carefully unhook thread from needle threader.
