Siriusxm Edge User Guide:

A Buyer's and User's Guide to Astronomical Telescopes and Binoculars James Mullaney, 2013-10-10 Amateur astronomers of all skill levels are always contemplating their next telescope and this book points the way to the most suitable instruments. Similarly, those who are buying their first telescopes and these days not necessarily a low cost one will be able to compare and contrast different types and manufacturers. This exciting and revised new guide provides an extensive overview of binoculars and telescopes. It includes detailed up to date information on sources, selection and use of virtually every major type, brand and model on today's market, a truly invaluable treasure trove of information and helpful advice for all amateur astronomers. Originally written in 2006, much of the first edition is inevitably now out of date as equipment advances and manufacturers come and go. This second edition not only updates all the existing sections of *A Buyer's and User's Guide to Astronomical Telescopes and Binoculars* but adds two new ones: Astro imaging and Professional Amateur collaboration. Thanks to the rapid and amazing developments that have been made in digital cameras, not those specialist cool chip astronomical cameras, not even DSLRs, but regular general purpose vacation cameras, it is easily possible to image all sorts of astronomical objects and fields. Technical developments including the Internet have also made it possible for amateur astronomers to make a real contribution to science by working with professionals. Selecting the right device for a variety of purposes can be an overwhelming task in a market crowded with observing options, but this comprehensive guide clarifies the process. Anyone planning to purchase binoculars or telescopes for astronomy, whether as a first instrument or as an upgrade to the next level, will find this book a treasure trove of information and advice. It also supplies the reader with many useful hints and tips on using astronomical telescopes or binoculars to get the best possible results from your purchase.

White Noise A. Calcutt, 1998-10-29 Transcending recent attempts to pigeonhole the information revolution this book shows how the paradoxical aspects of new media and the Internet is it masculine or feminine Does it mean peace or war are the peculiarly intense expression of the contradictions underlying our whole society Andrew Calcutt is an enthusiastic champion of the potential for new communications technology and a trenchant critic of the culture of fear which prevents its realisation *French Theory* François Cusset, 2008 Explores how the French theory of philosophy which became popular during the last three decades of the twentieth century spread to America and examines the critical practices that French theory inspired *Religions of Modernity* Stef Aupers, Dick Houtman, 2010 Religions of Modernity challenges the social scientific orthodoxy that once unleashed the modern forces of individualism science and technology inevitably erode the sacred and evoke the profane The book's chapters some by established scholars others by junior researchers document instead in rich empirical detail how modernity relocates the sacred to the deeper layers of the self and the domain of digital technology Rather than destroying the sacred tout court then the cultural logic of modernization spawns its own religious meanings unacknowledged spiritualities and magical enchantments The editors argue in the introductory chapter that the classical theoretical accounts of modernity by Max Weber Emile Durkheim and others already hinted at the future emergence of these religions of modernity *Primitives in the Wilderness* Peter C. van Wyck, 1997-07-31 In *Primitives in the Wilderness* Peter van Wyck brings the radical environmentalism known as deep ecology into an encounter with contemporary social and cultural theory With an eye to critically exposing unexamined essentialist and foundational commitments the author shows how deep ecology remains profoundly entangled with the very traditions of thought it has sought to overcome The author critically assesses deep ecology's relations with the Enlightenment modernity systems theory anthropocentrism the figure of wilderness and the trope of the primitive and the imagined promise of posthistoric primitivism He demonstrates the manner in which deep ecology and much of contemporary environmental thought has remained blind to the lessons and possibilities of contemporary social and poststructural theory Drawing from an array of contemporary theoretical works including Haraway's figure of the cyborg and situated knowledges Deleuze's conception of an image of thought Foucault's panopticon Trinh on ethnographic authority Lingis on the Other Torgovnick and Clastres's work on the primitive and power and Vattimo's weak thought van Wyck opens a clearing within which the ecological problematic and the question of the human subject
