

ANATOMY AND PHYSIOLOGY I

LAB #7--SKELETAL MUSCLES

NAME__Sarah Newman__1138_____

The objective of this lab is for learning the skeletal muscles that have been assigned to you for Exam III and Practical III.

1. Full and correct name of muscle
2. Location of muscle on the human body (asked on practical)
3. Action (s) of muscle (asked on exam)

USE THE INDEX IN THE BACK OF YOUR TEXTBOOK TO LOOK UP EACH MUSCLE AND TO SEE ON WHAT PAGES IT CAN BE FOUND. ALSO USE OTHER RESOURCES (IF YOU HAVE THEM AVAILABLE) TO LEARN THESE MUSCLES.... I.e. apps, google images, muscle atlas etc.

MUSCLE LOCATION

In this lab you have been given one small standing muscle model. Most of the muscles in your lab packet are identified on this model. In the situation where a muscle is not able to be seen on the small model there are other larger models set up around the room that you will be directed to. Each muscle in your lab will have a corresponding number on one of the models to help identify it. In your lab packet, place that number in the box next to the muscle. Some of the larger muscles may have more than one number; but just putting one of the numbers is all you need. Use pictures in your textbook or elsewhere to help you learn the muscle so that you can then identify them on the models. Most of the muscles are large and superficial and easy to find but some are small and deep and hard to find....superficial muscles sometimes have to be removed to see the deeper ones. A number of muscles have multiple parts to them but DON'T learn the parts just learn the muscle. For example the erector spinae muscle has 9 parts to it....do NOT learn the 9 parts just learn the erector spinae muscle; the scalene has 3 parts but do NOT learn the 3 parts just learn the scalene muscle, the triceps brachii has 3 parts just learn the triceps brachii muscle, etc.

MUSCLE ACTION(S)

In this lab, writing the actions of the muscles can be completed at home. I left you space in your lab packet next to each muscle so that you can write the actions when you do these later at home. If there is more than one action listed for a muscle the first action listed in the textbook is usually the major action for that muscle.

SUGGESTION:

GO IN ORDER!!!

Do one muscle at a time.

Do not go to the next muscle until you have properly identified it and its location.
