Horror Comics in Black and White Richard J. Arndt, 2013-01-21 In 1954 the comic book industry instituted the Comics Code a set of self regulatory guidelines imposed to placate public concern over gory and horrific comic book content effectively banning genuine horror comics Because the Code applied only to color comics many artists and writers turned to black and white to circumvent the Code s narrow confines With the 1964 Creepy 1 from Warren Publishing black and white horror comics experienced a revival continuing into the early 21st century an important step in the maturation of the horror genre within the comics field as a whole This generously illustrated work offers a comprehensive history and retrospective of the black and white horror comics that flourished on the newsstands from 1964 to 2004 With a catalog of original magazines complete credits and insightful analysis it highlights an important but overlooked period in the history of comics *Living With the Other* Avi Sagi, 2019-01-13 The book grapples with one of the most difficult questions confronting the contemporary world the problem of the other which includes ethical political and metaphysical aspects A widespread approach in the history of the discourse on the other systematically formulated by Emmanuel Levinas and his followers has invested this term with an almost mythical quality the other is everybody else but never a specific person an abstraction of historical human existence This book offers an alternative view turning the other into a real being through a carefully described process involving two dimensions referred to as the ethic of loyalty to the visible and the ethic of inner retreat Tracing the course of this process in life and in literature the book presents a broad and lucid picture intriguing to philosophers and also accessible to readers concerned with questions touching on the meaning of life ethics and politics and particularly relevant to the burning issues surrounding attitudes to immigrants as others and to the relationship with God the ultimate other A *General History and Collection of Voyages and Travels (Vol. 1-18)* Robert Kerr, 2020-07-01 Prepare yourslef for discoveries

and new adventures with this incredible book about the true origin of wanderlust This edition forms a complete history of the earliest start and progress of navigation discovery and commerce by sea and land from the earliest ages to the early 19th century First part of the work covers voyages and travels of discovery in the middle ages from the era of Alfred King of England in the ninth century to that of Don Henry of Portugal at the commencement of the fourteenth century Second part deals with general voyages and travels chiefly of discovery from the era of Don Henry in 1412 to that of George III in 1760 The rest of the work has some particular voyages and travels arranged in systematic order Geographical and Chronological and studies voyages during the era of George III conducted upon scientific principles by which the Geography of the globe has been nearly perfected

Design of Heuristic Algorithms for Hard Optimization Éric D. Taillard, 2022-10-29 This open access book demonstrates all the steps required to design heuristic algorithms for difficult optimization The classic problem of the travelling salesman is used as a common thread to illustrate all the techniques discussed This problem is ideal for introducing readers to the subject because it is very intuitive and its solutions can be graphically represented The book features a wealth of illustrations that allow the concepts to be understood at a glance The book approaches the main metaheuristics from a new angle deconstructing them into a few key concepts presented in separate chapters construction improvement decomposition randomization and learning methods Each metaheuristic can then be presented in simplified form as a combination of these concepts This approach avoids giving the impression that metaheuristics is a non formal discipline a kind of cloud sculpture Moreover it provides concrete applications of the travelling salesman problem which illustrate in just a few lines of code how to design a new heuristic and remove all ambiguities left by a general framework

Two chapters reviewing the basics of combinatorial optimization and complexity theory make the book self contained As such even readers with a very limited background in the field will be able to follow all the content

Emotion in Discourse J. Lachlan Mackenzie, Laura Alba-Juez, 2019-03-15 Interest in human emotion no longer equates to unscientific speculation 21st century humanities scholars are paying serious attention to our capacity to express emotions and giving rigorous explanations of affect in language We are unquestionably witnessing an emotional turn not only in linguistics but also in other fields of scientific research Emotion in Discourse follows from and reflects on this scholarly awakening to the world of emotion and in particular to its intricate relationship with human language The book presents both the state of the art and the latest research in an effort to unravel the various workings of the expression of emotion in discourse It takes an interdisciplinary approach for emotion is a multifarious phenomenon whose functions in language are enlightened by such other disciplines as psychology neurology or communication studies The volume shows not only how emotion manifests at different linguistic levels but also how it relates to aspects like linguistic appraisal emotional intelligence or humor as well as covering its occurrence in various genres including scientific discourse As such the book contributes to an emerging interdisciplinary field which could be labeled emotionology transcending previous linguistic work and providing an updated characterization of how emotion functions in human discourse

A Sociolinguistic History of British English Lexicography Heming Yong, Jing

Peng, 2021-09-15 A Sociolinguistic History of British English Lexicography traces the evolution of British English dictionaries from their earliest roots to the end of the 20th century by adopting both sociolinguistic and lexicographical perspectives It attempts to break out of the limits of the dictionary ontology paradigm and set British English dictionary making and research against a broader background of socio cultural observations thus relating the development of English lexicography to changes in English accomplishments in English linguistics social and cultural progress and advances in science and technology It unfolds a vivid coherent and complete picture of how English dictionary making develops from its archetype to the prescriptive the historical the descriptive and finally to the cognitive model how it interrelates to the course of the development of a nation s culture and the historical growth of its lexicographical culture as well as how English lexicography spreads from British English to other major regional varieties through inheritance innovation and self perfection This volume will be of interest to students and academics of English lexicography English linguistics and world English lexicography

Reconsidering Dementia Narratives Rebecca Bitenc, 2019-07-05 Reconsidering Dementia Narratives explores the role of narrative in developing new ways of understanding interacting with and caring for people with dementia It asks how the stories we tell about dementia in fiction life writing and film both reflect and shape the way we think about this important condition Highlighting the need to attend to embodied and relational aspects of identity in dementia the study further outlines ways in which narratives may contribute to dementia care while disputing the idea that the modes of empathy

fostered by narrative necessarily bring about more humane care practices This cross medial analysis represents an interdisciplinary approach to dementia narratives which range across auto biography graphic narrative novel film documentary and collaborative storytelling practices The book aims to clarify the limits and affordances of narrative and narrative studies in relation to an ethically driven medical humanities agenda through the use of case studies Answering the key question of whether dementia narratives align with or run counter to the dominant discourse of dementia as loss of self this innovative book will be of interest to anyone interested in dementia studies ageing studies narrative studies in health care and critical medical humanities

The Women Who Knew Too Much Tania Modleski, 2012-11-12 First published in 1988 The Women Who Knew Too Much remains a classic work in film theory and criticism The book consists of a theoretical introduction and analyses of seven important films by Alfred Hitchcock each of which provides a basis for an analysis of the female spectator as well as of the male spectator Modleski considers the emotional and psychic investments of men and women in female characters whose stories often undermine the mastery of the cinematic Master of Suspense This new edition features a new chapter which considers the last 15 years of Hitchcock criticism as it relates to the ideas in this landmark book

Language and Politics John E. Joseph, 2006-06-21 Language this book argues is political from top to bottom whether considered at the level of an individual speaker's choice of language or style of discourse with others where interpersonal politics are performed or at the level of political rhetoric or indeed all the way up to the formation of national languages By bringing together this set of topics and highlighting how they are interrelated the book will function well as a textbook on any applied or sociolinguistic course in which some or all of these various aspects of the politics of language are covered
