*Guantánamo and Beyond* Fionnuala Ni Aoláin, Oren Gross, 2013-08-26 The Military Commissions scheme established by President George W Bush in November 2001 has garnered considerable controversy In parallel with the detention facilities at Guantánamo Bay Cuba the creation of military courts has focused significant global attention on the use of such courts to process and try persons suspected of committing terrorist acts or offenses during armed conflict This book brings together the viewpoints of leading scholars and policy makers on the topic of exceptional courts and military commissions with a series of unique contributions setting out the current state of the field The book assesses the relationship between such courts and other intersecting and overlapping legal arenas including constitutional law international law international human rights law and international humanitarian law By examining the comparative patterns similarities and disjunctions arising from the use of such courts this book also analyzes the political and legal challenges that the creation and operation of exceptional courts produces both within democratic states and for the international community

*Beyond Preemption and Preventive War* Cindy Williams, 2008-11 Since 2002 the Bush White House has embraced a policy that it calls preemption or preventive war The new policy calls for the U S to go on the offensive when it believes that an enemy is gathering the capability to attack even though the time place or even likelihood of an enemy move is unknown and perhaps far in the future But this report maintains that the best defense may instead be the prevention of attacks on the U S and prevention of conflict around the globe Such a policy would be pursued through a stronger emphasis within the defense establishment itself on countering the proliferation of dangerous weapons and materials participating in stability operations and post conflict reconstruction and cooperating with allies

*Activists Beyond Borders* Margaret E. Keck, Kathryn Sikkink, 1998 The conventions of the nation state have shaped our contemporary understanding of the process and politics of social movements Keck and Sikkink sketch for the first time the dynamics of emergence strategies and impact of activists from different nationalities working together on particular issues This eagerly awaited work will alter the way scholars conceptualize the making of international society and the practice of international politics

**Beyond the Finish Line** Jonathan Finn, 2020-09-23 In the 1880s photographers and sports enthusiasts confidently declared the end of dead heats in sporting competition Reflecting a broader social belief in technology proponents of the camera stressed that the device could provide definitive proof of who won and who lost Yet despite this remedy for the inadequate human eye competitive races between horses boats and bicycles ended too close to call a sole champion More than a century later when cameras can subdivide the second into ten thousandths and beyond athletes continue to cross the finish line in ties In this fascinating journey through the history of the photo finish in sports Jonathan Finn shows how innovation was animated by a drive for ever more precise tools and a quest for perfect measurement As he traces the technological developments inspired by this crusade from the evolution of the still camera to movie cameras ultimately leading to complex contemporary photo finish systems Finn

uncovers the social implications of adopting and contesting the photograph as evidence in sport At every turn empirical obsession intersects with the unpredictability of sports creating a paradox wherein the precision offered by photo finish technology far exceeds the realities of human performance and its measurement Separating athletes by the hundredth thousandth or ten thousandth of a second is often a fiction that comes with significant material and cultural implications A lively biography of a critical technology Beyond the Finish Line illuminates the cultural role of the photo finish in win at all costs culture and warn that in our pursuit for precision we may threaten the human element of sport that galvanizes mere spectators into fans **The Army Medical Bulletin** ,1925 **Translation Beyond Translation Studies** Kobus

Beyond NATO Ted Galen Carpenter, 1994 The Cold War is over the Soviet Union is gone and America faces no other great power threat to its security Yet Washington continues to spend 90 billion a year on the North Atlantic Treaty Organization In Beyond NATO Staying Out of Europe's Wars Ted Galen Carpenter argues that the United States needs to adopt an entirely new policy toward Europe He contends that preserving NATO is unnecessary because the West European nations now have the economic and military resources to protect their own security Proposals to expand NATO into Central and Eastern Europe including the Clinton administration's Partnership for Peace are especially dangerous Enlarging the alliance would risk a military confrontation with Moscow over a region in which Russia has long standing political and security interests Perhaps even worse a larger NATO would entangle America in the numerous parochial quarrels and conflicts of the East European nations themselves Carpenter warns that the Bosnian war is the kind of problem that NATO will repeatedly encounter if it moves east He calls on the United States to withdraw from the alliance encourage the European powers to

take responsibility for the stability of their own region and form a more limited and flexible security relationship with Western Europe Above all he urges U S policymakers to remain aloof from European conflicts that do not have a direct and significant bearing on America s vital interests      **Beyond Stalinism** Ronald J.
