Comparative International Law Approaches for Optimizing Petro-Wealth in Nigeria: The Sustainable Development Pathway Dr. Onome Ejenavi, 2024-03-24 International and Comparative Law Approaches for Optimizing Petro Wealth in an SDGs Context and in harmony with sustainable development forms the core and subject of this book This book considers a beleaguered Nigerian oil industry and the pervasive contemporary struggles to sustain lucrative oil production in the 21st Century Currently Nigeria grapples with unrelenting and intractable challenges in its oil industry and apparently a plausible means of alleviating the extensive negative impacts of untenable oil exploitation patterns in the Niger delta have remained elusive From the foregoing the missing ingredient seems to be a dismal lack of sustainability endeavored approaches to guarantee a green petroleum industry economic growth and poverty eradication which remain vital considerations for a developing state like Nigeria Apparently the development that meets the needs of the present without compromising the interests options and indeed the needs of future generations summed up in the definition of sustainable development appears to be a maxim with minimal recognition or import in the Niger Delta which remains the hub of oil exploitation in Nigeria This book is thus motivated by the constantly evolving yet irrefutable implications arising from the concept of Sustainable Development and how it can be realistically applied to oil and gas exploitation

Forgotten Values Teresa Kramarz, 2020-08-25 An examination of the conflict between values and bureaucracy in World Bank biodiversity partnerships that sheds light on this model of global environmental governance Multi stakeholder partnerships have become an increasingly common form of global governance Partnerships usually between international organizations IOs or state agencies and such private actors as NGOs businesses and academic institutions have even been promoted as the gold standard of good governance participatory innovative and well funded And yet these partnerships often fail to live up to the values that motivated their establishment In this book Teresa Kramarz examines this gap between promise and performance by analyzing partnerships in biodiversity conservation initiatives launched by the World Bank

The World Bank Group's Partnership with the Global Environment Facility The World Bank, 2015-11-18 The World Bank Group was a principal founding partner of the Global Environment Facility GEF in its pilot phase in 1991 and of the restructured GEF in 1994 The Bank plays three different roles in the GEF a as trustee of the GEF and related trust funds b as implementing agency

including the implementation of private sector GEF projects by the International Finance Corporation IFC and c as the host organization of the functionally independent GEF secretariat Focusing primarily on the role of the Bank as an implementing agency this review documents how the partnership that the GEF and the World Bank Group established in the early 1990s has evolved over time offers explanations for observed changes and draws a number of lessons The review addresses the following issues The mutual relevance of the World Bank Group and the GEF Inter organizational coordination along the World Bank Group GEF project cycle The introduction of the GEF s resource allocation systems in 2006 and 2010 The evolution and effectiveness of the Bank Group s GEF portfolio Catalytic approaches in the Bank Group GEF partnership co financing blending and mainstreaming The World Bank s corporate activities as a GEF implementing agency The principal purposes of this review are a to help improve the relevance and effectiveness of the Bank Group s partnership with the GEF and b to draw lessons for the Bank Group s partnership with the GEF and other large global partnership programs

The Impact of Climate Change Mitigation on Indigenous and Forest Communities Maureen F. Tehan, Lee C. Godden, Margaret A. Young, Kirsty A. Gover, 2017-10-26 The international legal framework for valuing the carbon stored in forests known as Reducing Emissions from Deforestation and Forest Degradation REDD will have a major impact on indigenous peoples and forest communities The REDD regime contains many assumptions about the identity tenure and rights of indigenous and local communities who inhabit use or claim rights to forested lands The authors bring together expert analysis of public international law climate change treaties property law human rights and indigenous customary land tenure to provide a systemic account of the laws governing forest carbon sequestration and their interaction Their work covers recent developments in climate change law including the Agreement from the Conference of the Parties in Paris that came into force in 2016 The Impact of Climate Change Mitigation on Indigenous and Forest Communities is a rich and much needed contribution to contemporary understanding of this topic

The Politics of Globalisation and Polarisation Maurice Mullard, 2004-01-01 This book deals with the nature of contemporary globalisation Maurice Mullard aims to show that globalisation is not an inescapable unstoppable process somehow beyond human control rather that it represents and is being shaped by a series of deliberate policy choices and policy decisions The emphasis of this fascinating work is on how these policy choices are creating new forms of economic inequalities and also political elites that distort the democratic process

Cost Benefit Analysis and Distributional Preferences Helen Scarborough, Jeff Bennett, 2012-01-01 Helen Scarborough and Jeff Bennett have produced a work that is genuinely path breaking As is often the case with path breaking work the idea is simple enough if people can respond to choice experiments in ways that tell us a lot about what they value and how much they value it why would they not be able to respond to choice experiments where the options offered have different distributional consequences Such simple ideas evade implementation not because they are so hard to think up but because it is so easy to dismiss them as unthinkable All credit goes to Scarborough and Bennett for busting through this

particular unthinkability barrier The authors may be surprised by the magnitude and the nature of the impact this work eventually enjoys From the foreword by Alan Randall The University of Sydney Australia and The Ohio State University US This pathbreaking study illustrates and enhances the potential of costbenefit analysis as a tool for decision making Advancing the incorporation of equity preferences in policy analysis the authors demonstrate the application of choice modelling to the estimation of distributional weights suitable for inclusion in a costbenefit analytical framework A platform for discussion of the challenges and opportunities of this approach is presented in the form of a detailed case study designed to estimate community preferences for different intergenerational distributions While the case study is focused on natural resource management and environmental policy the conceptual and methodological advances illustrated by the authors are relevant and applicable to a wider array of policy deliberations This book will prove a challenging and thought provoking read for academics students and policymakers with an interest in environmental issues and or public sector economics **Country**

Frameworks for Development Displacement and Resettlement Susanna Price,Jane Singer,2019-03-28 The problem of escalating population displacement demands global attention and country co ordination This book investigates the particular issue of development induced displacement whereby land is seized or restricted by the state for the purposes of development projects Those displaced by these schemes often risk losses to their homes livelihoods food security and socio cultural support for which they are rarely fully compensated Bringing together 22 specialist researchers and practitioners from across the globe this book provides a much needed independent analysis of country frameworks for development induced displacement spanning Asia Africa Central and South America As global competition for land increases public and private sector lenders are lightening their social safeguards shifting the oversight for protecting the displaced to national law and regulations This raises a central question Do countries have effective ways of addressing the risks and lost opportunities for their people who are displaced While many countries remain impervious to the problem the book also shines a light on the few who are pioneering new legislation and strategies intended to address questions such as should the social costs to those displaced help determine whether a project meets the public interest and merits financing Does the modern state need powers of eminent domain How can country laws systems institutions and negotiations be reformed to protect citizens better against disempowering public and private sector development displacement This book will interest those working on forced and voluntary migration property and expropriation law human rights environmental and social impact assessment internal and refugee displacement from conflicts environment change disasters and development Environmental Management in

ASEAN Maria Seda,1993 The problem of environmental degradation in the ASEAN region cannot be underestimated The articles in this book examine some of the common environmental issues faced by countries in the region They provide a brief overview of some major environmental problems such as fisheries management tropical deforestation and pollution in urban areas and highlight some of the research policy and institutional constraints in the region **Emptied Lands** Alexandre

Kedar,Ahmad Amara,Oren Yiftachel,2018-02-27 *Emptied Lands* investigates the protracted legal planning and territorial conflict between the settler Israeli state and indigenous Bedouin citizens over traditional lands in southern Israel Palestine The authors place this dispute in historical legal geographical and international comparative perspectives providing the first legal geographic analysis of the dead Negev doctrine used by Israel to dispossess and forcefully displace Bedouin inhabitants in order to Judaize the region The authors reveal that through manipulative use of Ottoman British and Israeli laws the state has constructed its own version of terra nullius Yet the indigenous property and settlement system still functions creating an ongoing resistance to the Jewish state *Emptied Lands* critically examines several key land claims court rulings planning policies and development strategies offering alternative local regional and international routes for justice
